Bay County, Past and Present George Ernest Butterfield, 1918 From the Introduction Careful study of the home region furnishes an excellent foundation for the later study of the geography history and government of our nation and of other nations It is interesting and understandable because the child is living in the midst of the conditions events and things studied He sees old friends in a new light Moreover most of the elements in the more advanced studies are to be found at home in the regional study The interaction between man and his physical surroundings has taken place in many ways right here in Bay County The forests furnish the best example for they attracted the people here furnished them with their occupations and in the meantime were cleared away by those people who established rich farms and built great factories in their places Bay City furnishes a good example of two types of cities as it combines the elements both of the trading and distributing center and of the manufacturing center Government has developed step by step from the very simple government of an unsettled region into the complex government of a densely populated county

Reclaiming a Plundered Past Magnus T. Bernhardsson, 2005 The looting of the Iraqi National Museum in April of 2003 provoked a world outcry at the loss of artifacts regarded as part of humanity's shared cultural patrimony But though the losses were unprecedented in scale the museum looting was hardly the first time that Iraqi heirlooms had been plundered or put to political uses From the beginning of archaeology as a modern science in the nineteenth century Europeans excavated and appropriated Iraqi antiquities as relics of the birth of Western civilization Since Iraq was created in 1921 the modern state has used archaeology to forge a connection to the ancient civilizations of Mesopotamia and or Islamic empires and so build a sense of nationhood among Iraqis of differing religious traditions and ethnicities This book delves into the ways that archaeology and politics intertwined in Iraq during the British Mandate and the first years of nationhood before World War II Magnus Bernhardsson begins with the work of British archaeologists who conducted extensive excavations in Iraq and sent their finds to the museums of Europe He then traces how Iraqis growing sense of nationhood led them to confront the British over antiquities law and the division of archaeological finds between

Iraq and foreign excavators He shows how Iraq's control over its archaeological patrimony was directly tied to the balance of political power and how it increased as power shifted to the Iraqi government Finally he examines how Iraqi leaders including Saddam Hussein have used archaeology and history to legitimize the state and its political actions
