## **Geography Paper 1 2013 September:**

**Refugees in Extended Exile** Jennifer Hyndman, Wenona Giles, 2016-10-04 This book argues that the international refugee regime and its temporary humanitarian interventions have failed. Most refugees across the globe live in protracted conditions that extend from years to decades without legal status that allows them to work and establish a home. It is contended that they become largely invisible to people based in the global North and cease to remain fully human subjects with access to their political lives. Shifting the conversation away from the salient discourse of solutions and technical fixes within state-centric international relations, the authors recover the subjectivity lost for those stuck in extended exile. The book first argues that humanitarian assistance to refugees remains vital to people's survival even after the emergency phase is over. It then connects asylum politics in the global North with the intransigence of extended exile in the global South. By placing the urgent crises of protracted exile within a broader constellation of power relations, both historical and geographical, the authors present research and empirical findings gleaned from refugees in Iran, Kenya, and Canada and from humanitarian and government workers. Each chapter reveals patterns of power circulating through the colonial present, Cold War legacies, and the global war on terror. Seeking to render legible the more quotidian struggles and livelihoods of people who find themselves defined as refugees, this book will be of great interest to international humanitarian agencies as well as migration and refugee researchers, including scholars in refugee studies and human displacement, human security, globalization, immigration, and human rights.

**Alternative Tourism in Turkey** Istvan Egresi, 2016-12-08 This book takes inventory of and evaluates the available resources for the development of alternative tourism in Turkey. It examines the role of alternative tourism in future tourism development plans and proposes public policies necessary to assure sustainability. Although tourism started later in Turkey than in the Western Mediterranean countries, it has grown very rapidly during the last three decades, and today the

country ranks among the top ten countries in the world in terms of both arrivals and receipts. However, most of the tourism development has been in the mass tourism sector or the so-called sun, sea, and sand tourism. While crucial for the economic development of Turkey, mass tourism in the absence of proper planning has happened in a haphazard manner, leading to numerous environmental and socio-cultural problems. This book argues that in order to mitigate these problems, Turkey should encourage the development of alternative forms of tourism.
