Geography Paper 1 November 2013:

Territorial Disputes in the South China Sea J. Huang, A. Billo, 2014-12-09 Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved complex territorial disputes This volume offers detailed insights into a range of country perspectives addressing the historical legal structural regional and multilateral dimensions of these disputes

The Trans Pacific Partnership, China and India Amitendu Palit, 2014-06-05 The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans Pacific Partnership TPP The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations It is expected to eventually mature into a regional trade agreement covering the entire Asia Pacific As of now it does not include China and India the two largest emerging markets and regional economies The TPP has generated controversy for its excessive emphasis on trade issues which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo political strategy of the US for supporting its strategic rebalancing towards Asia From both economic and geo political perspectives the TPP has various significant implications for China and India that are examined in the book This book sheds light on how China and India's entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward oriented reforms The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India Otherwise the TPP and China and India might walk divergent paths and trade and regional integration in Asia Pacific may not ever converge This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India's roles in global and regional trade

Handbook on Complexity and Public Policy
Robert Geyer, Paul Cairney, 2015-05-29 Over recent years Complexity Science has revealed to us new limits to our possible knowledge and control in social cultural and economic systems Instead of supposing that past statistics and patterns will give us predictable outcomes for possible actions we now know the world is and will always be creative and surprising Continuous structural evolution within such systems may change the mechanisms descriptors problems and opportunities often negating policy aims We therefore need to redevelop our thinking about interventions policies and policy making moving perhaps to a humbler more learning approach In this Handbook leading thinkers in multiple domains set out these new ideas and allow us to understand how these new ideas are changing policymaking and policies in this new era Peter M Allen Cranfield University UK

Accessibility, Equity and Efficiency Karst T. Geurs, Roberto Patuelli, Tomaz Ponce Dentinho, 2016-02-26 Leading researchers from around the world show in this volume the importance of accessibility in contemporary issues such as rural depopulation investments in public services and public transport and transport infrastructure investments in Europe

The trade offs between accessibility economic development and equity are comprehensively examined and a variety of approaches to measuring accessibility and equality presented The book s interdisciplinary contributions also provide different geographical contexts from the US to various European and developing countries and cover ex ante and ex post evaluation of transport investment Improving transport accessibility is a main objective in transport policy and planning in developed and developing countries all over the world Investment is motivated by the need to develop and or reduce spatial or social inequalities However the economic and equity implications of investments in transport are not straightforward The concepts of accessibility and equity can be defined and operationalized in many different ways influencing outcomes and conclusions Moreover equity and efficiency goals are often conflicting Accessibility models not only help to explain spatial and transport patterns in developed and developing countries but are also powerful tools to explain the equity and efficiency impacts of urban and transport policies and projects This state of the art overview of the accessibility economic efficiency equity relationship will appeal to researchers as well as transport and urban planners interested in accessibility issues and transport regional developments
