Proceedings of the 2nd International Academic Conference on Blockchain, Information Technology and Smart Finance (ICBIS 2023) Jerome Yen, Mohammad Zoynul Abedin, Wan Azman Saini Bin Wan Ngah, 2023-07-25 This is an open access book. With the rapid development of modern economy and Internet technology the traditional financial industry has to develop Internet finance to provide better services and meet the needs of the times. It is against this background that the blockchain, relying on its special advantages: collective maintenance, reliable databases and decentralization, provides the reliability to solve the credit risk of Internet finance. This has an impact on institutions, trust mechanisms, risk control, etc. in the Internet finance industry and has derived more new application scenarios, thus paving the way for the development of finance in the Internet era. Applying blockchain technology to the financial field can promote data information sharing, improve value transmission efficiency and enhance database security. The financial market based on the decentralized system of blockchain technology can reduce the operating costs of financial institutions, improve economic efficiency and solve problems such as information asymmetry. The new financial business model of blockchain finance is conducive to improving the Internet credit reporting system, preventing and controlling Internet financial risks and further realizing financial disintermediation. At present in China's financial field, blockchain technology has been applied and innovated in supply chain finance, cross border payment, trade finance, asset securitization and other scenarios. To promote the exchange and development of blockchain information technology and financial experts and scholars, the 2nd International Academic Conference on Blockchain Information Technology and Smart Finance ICBIS 2023 will be held in Hangzhou from February 17 to 19, 2023. This conference mainly focuses on the latest research on blockchain information technology and smart finance. This conference brings together experts, scholars, researchers and relevant practitioners in this field from all over the world to share research results, discuss hot issues and provide participants with cutting edge scientific and technological information so that you can timely understand the development trends of the industry and master the latest technologies, broaden research horizons and promote academic progress.
