Spatial Implications and Planning Criteria for High-Speed Rail Cities and Regions José Maria de Ureña, Chia-Lin Chen, Anastasia Loukaitou-Sideris, Roger Vickerman, 2021-03-29 Spatial Implications and Planning Criteria for High speed Rail Cities and Regions evaluates the varied experiences that HSR systems have brought about to different station cities and their regional territories around the world with an eye towards better future planning and policy of such systems This edited volume draws from examples of high speed rail operations in different cities in Europe and Asia to depict the various impacts of this major transportation infrastructure It attempts to distinguish the short and long term impacts described in the literature classifying them into regional and inter urban effects urban effects and wider economic impacts Planning challenges appear at two major points 1 during the initial planning stage that includes the route and location of stations and 2 during the development process that follows The case studies in the book concentrate on a variety of topics from the impact of high speed rail on population growth in some station cities to the regional economic impacts that an HSR system can bring about to the larger territories it passes through to the potential of station cities to better attract firms or to experience increases in tourism and commerce They also assess planning strategies and experiences from station cities to draw lessons for future HSR planning policies The Chapters in this book were originally published in a special issue of European Planning Studies

Local Experiences of Mining in Peru Gerardo Castillo Guzmán, 2020-02-05 This book uses a multimethod approach to examine local experience of contemporary mining development in the Peruvian Andes creating an understanding of the transformations that rural societies experience in this context Mining is a major component of economic growth in many resource endowed countries whilst also causing mixed social cultural and environmental effects Most current literature on contemporary mining in Peru is largely focussed

on conflict however in this text the author takes a differing approach by examining the experiences of families in the vicinity of Rio Tinto's La Granja exploration copper project Northern Peru an area with great significance due to the mining investment and development which has taken place over the past 25 years The book first provides a critical discussion about production of space theories and debates on spatial mobility highlighting their relevance to understanding large scale mining developments especially in the Peruvian Andes The following chapters analyze spatial transformations mining development has prompted focusing on four axes access to space production mobility and representations of space A comprehensive narrative is constructed drawing on diverse voices and perspectives including those of family heads and their partners local leaders company employees and social scientists The book concludes by discussing how the findings challenge some of the current accounts of the social effects of mining development on rural communities and pose significant implications for sustainable development programs and place based practices By taking an interdisciplinary approach this book will appeal to a wide audience including geographers social anthropologists and social scientists interested in the social effects of mining as well as researchers interested in current Latin American Studies and Rural Development

Evaluating the Local Impacts of the Rio Olympics Marcelo Neri, 2020-07-05 This book evaluates the local impacts and legacies of the Olympics in Rio by comparing Rio 2016 with other Olympic experiences and evaluating the ways in which the Games served the city The 2016 Rio Olympic Games took place in a scenario of enormous economic challenges and persistent inequalities In contrast to all previous Olympic experiences Brazil faced its worst economic recession ever recorded during the preparation phase for the Games In addition to the national crisis falling oil prices and corruption scandals fuelled the State of Rio's economic downfall This book specifically assesses the relative social performance of Rio's city population with respect to control groups covers traditional aspects of the Games legacy such as tourism infrastructure and sports practice includes ordinary day by day aspects of the city's life such as education employment and housing and scrutinizes critical areas such as urban mobility gentrification and Guanabara Bay's pollution This thorough analysis offers readers further understanding on assessing the impacts and legacies of the Olympic experience It will be of great interest to upper level students and academics of tourism hospitality and events management

Rare Earth Frontiers Julie M. Klinger, 2018-01-15 Rare Earth Frontiers is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the

grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation

A University Education David Willetts,2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In A University Education David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework
