Myanmar's Enemy Within Francis Wade, 2017-08-15 For decades Myanmar has been portrayed as a case of good citizen versus bad regime men in jackboots maintaining a suffocating rule over a majority Buddhist population beholden to the ideals of non violence and tolerance But in recent years this narrative has been upended In June 2012 violence between Buddhists and Muslims erupted in western Myanmar pointing to a growing divide between religious communities that before had received little attention from the outside world Attacks on Muslims soon spread across the country leaving hundreds dead entire neighbourhoods turned to rubble and tens of thousands of Muslims confined to internment camps This violence breaking out amid the passage to democracy was spurred on by monks pro democracy activists and even politicians In this gripping and deeply reported account Francis Wade explores how the manipulation of identities by an anxious ruling elite has laid the foundations for mass violence and how in Myanmar's case some of the most respected and articulate voices for democracy have turned on the Muslim population at a time when the majority of citizens are beginning to experience freedoms unseen for half a century

Page and Place: Ongoing Compositions of Plot Jon

Anderson,2014-10-15 If people are geographical beings what can fiction tell us about this truth This book explores how literature can help us understand the nature of the relations between people and place how humans create connections between their identities and their geographies and how these can be threatened and lost Literature is an important if unusual way to explore these relations At once centred in imagination and ideas fiction is also indelibly connected to as well as influenced by the geographies in which it is set As this book argues the relationship between fiction and location is so important that it is often difficult to know which is imagined and which is real Exploring the relations between people and place through fiction writing set in Wales Page and Place garners poetic insight into how places are written into our stories and how these stories take and make the places around us The book introduces the notion of plot to describe the complex entanglement between fiction and geography and to help understand the role that places play in defining human identity
