

New to the 16-inch MacBook Pro...

Mid-November 2019, the 16-inch MacBook Pro was given a mid-life update with some fairly impressive changes:

- A slightly larger screen with more densely packed pixels
- A re-designed keyboard with a return to the scissor key mechanism
- Updated built-in speakers
- An improved microphone
- An all-new thermal system for better peak performance
- More RAM and storage

Let's take a look at these changes in more detail.

The Keyboard

The 16-inch MacBook Pro brings back the scissor key mechanisms in lieu of the previous generation's butterfly-switch keyboard. It also features a return of the inverted T arrow keys, plus a hardware Escape key alongside the Touch Bar.

Going back to the scissor key mechanism is Apple's response to criticism and hardware faults dating back nearly three years. With an additional 0.5mm of key travel when compared to the previous butterfly keyboard, typing on the new MacBook Pro is a more satisfying experience, while the "click" sound from each key is more sturdy and solid. There's also more space between each of the keys, making it easier to feel your way around the keyboard with your fingertips.

Above the keyboard sits a smaller Touch Bar. The Escape key is now physically separate, in part because of criticism that there was no way to force quit apps when the Touch Bar crashed. The Touch ID sensor is also a separate key, making it more obvious where to place your fingertip when unlocking the machine or powering it on or off.

In the bottom-right corner of the keyboard is a revised set of arrow keys. They're no longer split apart, making it easy to place your fingers on the correct key without fumbling.

Display

For the 16-inch MacBook Pro, Apple didn't use the same number of pixels and make them bigger — they actually made the pixels slightly smaller and added more of them to make a bigger display. In short, the new 16-inch MacBook Pro has a display that's able to show more content. Here are the two screens compared side-by-side:

15-inch MacBook Pro	16-inch MacBook Pro
2880 × 1800 pixels	3072 × 1920 pixels
220 pixels per inch	226 pixels per inch

Audio

The entire audio system has been overhauled for the 2019 MacBook Pro, making for one of the most significant changes the MacBook has received since the Retina Display was introduced in 2012. It's just a change you can't see.

The speaker system now includes six speakers, with three on either side. Dual force-canceling woofers mean the speakers can play audio louder and with more bass, without causing excessive vibrations throughout the MacBook's chassis. These new speakers aren't just louder, but they sound better too. They're good enough to be used as standalone speakers for playing music with a room and make video content sound better than ever before.

Complementing the upgraded speaker system is a 3-microphone array, which Apple is describing as studio quality. While recording audio, it produces less hiss and background noise, and it makes FaceTime calls more natural and pleasant.

Other minor upgrades

Thermal architecture

The 16-inch MacBook Pro retains the same processor as it's predecessor, but thanks to an all-new thermal system, the chips can run at peak performance for longer, shortening complex tasks like video encoding.

Memory

Both base models now come with 16 GB of base (DDR4-3200) and can be configured up to 64 GB. Apple is also offering the ability to configure a MacBook Pro with up to 8 TB of SSD storage — that's the same amount of storage as the all-new Mac Pro.

Battery

A bigger 100-WHr lithium-polymer battery now provides an additional 1.5 hour of battery life. Interestingly, a 100-WHr battery is the maximum size allowed onto planes within the U.S.
