General Biology Textbook:

General Biology Perry Daniel Strausbaugh, Bernal Robinson Weimer, 1946 *GENERAL BIOLOGY I* Dennis Holley, 2017-05-31 *GENERAL BIOLOGY Investigating Life* is an introductory level college biology textbook that provides students with an accessible and engaging look at the fundamentals of biology. Written for a two-term undergraduate course of mixed majors and non-majors, this reader-friendly text is concept-driven vs. terminology-driven. That is, the text is based on the underlying concepts and principles of biology rather than strict memorization of terminology. Written in a student-centered conversational style, this educational research-based textbook uniquely connects students and our society to living things from various perspectives: economic, ecologic, medical, and cultural, exploring how the biological world and human realm are intimately intertwined. End-of-chapter questions challenge students to think critically and creatively while incorporating science process skills and biological principles.

Third Revised Edition* Edith Grace WHITE, 1947 **A Textbook of General Biology ... With 295 Illustrations** Edith Grace WHITE, 1933 **Textbook of General Biology** Karl Clayton Hyde, Marion E. Knowles, 1931 **A Textbook of General Biology. 3rd Rev. Ed** E. G. White, 1947 **Contemporary Readings for General Biology** John W. Crane, 1994

Intended for courses in general biology, this book illustrates the relevance of biology to students' lives and should help motivate students to understand the basic concepts. Applications and discoveries are discussed.

Integrating Lecture and Lab Leslie King, 2014-08-14 *Integrating Lecture and Lab: A General Biology Laboratory Manual* is designed for students majoring in Biology and can be used in conjunction with many different lower-division biology textbooks. The user-friendly manual encourages students to think of lecture and lab as a cohesive unit. This is accomplished by requiring them to use the information they are learning in lecture and the material presented in the manual, including standard experiments to complete assignments. One half of the manual covers taxonomy, and the other half is devoted to introductory comparative physiology. Because classification of organisms can vary from textbook to textbook, many formal taxa have been eliminated from this manual. Students complete taxonomy assignments based on information they receive in class lectures and from their lecture textbook, which is what makes this manual usable with a variety of lower-division biology texts in a variety of general biology courses. Adopting professors will receive a laboratory preparation guide and a question and answer teaching edition of the manual. Classroom-tested *Integrating Lecture and Lab* helps biology students successfully apply information they learn in their lectures.
