Working Together is a concise resource that provides future teachers with exactly what they need to know when working with the families of young children. Chapters detail the benefits of family involvement for families, teachers, and especially children. Using the voices of many family members and teachers, this book describes diverse family types and cultures and gives specific strategies teachers can use to involve family members and the community in the life of a class or school. The family involvement strategies are divided into written communication, shared time, and other ways to involve families. Strategies are practical and are based on the experiences of early childhood educators.

[Global Trends in Media Education](#) Tony Lavender, Birgitte Tufte, Dafna Lemish, 2003

Over the last decades, Media Education has gradually obtained an educational status in many countries throughout the world, although few countries have actually incorporated this subject in their formal school curricula. Where Media Education is taught today, it is principally carried out using a relaxed, pluralistic, and a cross- or multidisciplinary approach. This book sets out to explore this new approach to the subject via chapters that are representative of ongoing work by leading Media Education researchers in nine different countries and from all five continents. Media Education is continually evolving, and the individual chapters indicate that the passion for the subject is global, while the actual translations of practices and policies are very much local. The book expands the debate about Media Education beyond the traditions and interests of one part of the world to encompass the needs of the rest.
