United States. Federal Aviation Administration, 1979 *Instructions for Completion of the Flight Plan Form*, 1985 **Northrop X-4 Bantam Pilot's Flight Operating Instructions** United States Air Force, 2008-09-01

Designed without horizontal stabilizers the X 4 Bantam had a semi tailless design that bore some resemblance to Germany's Me 163 rocket plane The small twin jet craft relied on combined elevator and aileron surfaces known as elevons for pitch and roll control The role of the X 4 was to explore the transonic speed zone and to determine whether the design would lessen the stability and control problems affiliated with compressibility Although two Bantams were built only one proved mechanically sound The second was flown over eighty times by Northrop Air Force and NACA pilots They learned that the X 4 was sensitive in pitch and showed a tendency to hunt about all three axes as it approached Mach 1.0 Thus the X 4's design proved a failure Originally printed by Northrop NACA and the USAF this handbook provides a fascinating glimpse inside the cockpit of this experimental plane The manual was recently declassified and is here reprinted in book form Aircraft Inspection, Repair and Alterations (2025) Federal Aviation Administration (FAA), U.S. Department of Transportation, 2025-05-06 Aviation Supplies Change 1 Sept 2004 Editorial Update May 2024 Includes AC 43 13 2B current in 2025 Issued March 2008 This handbook for Aviation Mechanics Aviation Maintenance Technicians schools AMT repair stations aircraft owners and homebuilders details the standards for acceptable methods techniques and practices for the inspection repair and alteration of aircraft It is a compilation of the two most important Advisory Circulars ACs written by the Federal Aviation Administration FAA on this topic namely Acceptable Methods Techniques and Practices Aircraft Inspection and Repair AC 43 13 1B and Acceptable Methods Techniques and Practices Aircraft Alterations AC 43 13 2B which are key references for the Aviation Mechanic FAA Knowledge Exams AC 43 13 1B provides details on the materials and practices health and safety inspection repair and finishes for wood structures fabric covering fiberglass and plastics and metal structures welding and brazing It includes chapters dedicated to nondestructive inspection NDI corrosion inspection and protection aircraft hardware control cables and turnbuckles engines fuel exhaust propellers aircraft systems and components weight and balance electrical systems avionics and human factors AC 43 13 2B is a manual filled with details and instructions for the installation of aircraft components and systems such as
