## Human Body Systems Packets

In this packet, you will need to complete research, both in your textbook and online, on some of the organ systems found in the human body. This packet does not cover all 11 organ systems, but you will need background information and research on each of the organ systems in order to complete the write up segment of this assignment.

On each page, you will see the title of one of the organ systems. Also, there is a silhouette of a human body. This outline has been purposefully left gender neutral and should be left so, unless it directly relates to the organ system titled on the page. On this silhouette, you will need to draw an anatomically-correct representation of the titled organ system, including the main organs (labeled), what the organs look like, and where they would be found in the human body. This should be initially done in pencil, before being finalized in color.

On the back of each page, you will need to include a detailed paragraph of that particular organ system. This paragraph will need to be typed on a separate document and then cut and pasted onto this packet. The paragraph for each organ system must be a minimum of nine (9) sentences long. It must be 12-point font, Times New Roman, spell- and gram-mar-checked. Each paragraph should discuss, in detail, exactly what the organ system does for the body, the main organs of the organ system, and what those organs specifically do for the organ system. Furthermore, the paragraph should discuss which two other organ systems would first be affected by the demise of this system. Be sure to explain why and provide adequate evidence and reasoning for your statement (using research).

Points will be assigned as follows:

Organ System	Diagram - This is correctly drawn, colored, and labeled, showing effort.	Paragraph - This follows all formatting guidelines, covers all information, shows evidence and reasoning, and shows clear effort.
Muscular System	1 2 3 4 5	1 2 3 4 5 6 7
Skeletal System	1 2 3 4 5	1 2 3 4 5 6 7
