encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However  
there is information and then there is correct appropriate and timely information While we might love being able to turn to  
Wikipedia for encyclopedia like information or search Google for the thousands of links on a topic engineers need the best  
information information that is evaluated up to date and complete Accurate vetted information is necessary when building  
new skyscrapers or developing new prosthetics for returning military veterans While the award winning first edition of Using  
the Engineering Literature used a roadmap analogy we now need a three dimensional analysis reflecting the complex and  
dynamic nature of research in the information age Using the Engineering Literature Second Edition provides a guide to the  
wide range of resources available in all fields of engineering This second edition has been thoroughly revised and features  
new sections on nanotechnology as well as green engineering The information age has greatly impacted the way engineers
