Performance Management in Humanitarian Logistics. Development of a Process-driven and IT-supported Performance Measurement System Adam Widera, 2023-08-25 Logistics and supply chain management are considered as the backbone of humanitarian operations significantly influencing their performance Consequently it is not surprising that the academic community addressed performance measurement in humanitarian logistics early on and extensively However there exists a significant disparity between the academic findings on performance measurement and their practical implementation within humanitarian organizations What factors contribute to this gap and how can we bridge it This book aims to provide a socio technical solution through an action researchbased approach that designs and develops a process driven and IT supported performance management system for humanitarian logistics By utilizing an iterative and participatory design methodology an active involvement of humanitarian organizations in identifying

and addressing their practitioner realities needs and objectives is ensured The resulting performance management system has been designed implemented and evaluated within three distinct and representative humanitarian organizations As a result these research findings hold promise for enhancing the capabilities of humanitarian organizations to measure and manage logistics performance effectively
