Writing Dissertations and Theses in Psychology Stephen Haynes, John Hunsley, 2020-12-28 This accessible guide equips students to succeed in their master's thesis or doctoral dissertation in psychology. The authors provide concrete assistance to the myriad tasks and requirements that students will encounter as they plan, conduct, and present their dissertation or thesis research. Drawing upon their many years of experience in working with graduate students, the authors address the multiple stages of the dissertation and thesis process. They take you through drafting the proposal, the advisor-advisee relationship, interacting with committee members, the writing process, handling obstacles, and the final presentation. Chapters provide guidance on using a research team, collecting data, conducting a literature review, and even acquiring financial support. Finally, students will find additional resources such as practical information on copyright issues, research methods, case analyses, and teleconferencing. This is an essential book for both graduate psychology students working on their master's theses or doctoral dissertations and their advisors.

How To Do Your Dissertation in Geography and Related Disciplines Tony Parsons, Peter G Knight, 2015-02-20 This book provides undergraduates with a step-by-step guide to successfully carrying out an independent research project or dissertation. The book addresses each stage of the project by answering the questions that a student is likely to ask as the work progresses from choosing the subject area and planning the data collection through to producing illustrations and writing the final report. Most undergraduates in geography and related disciplines are required to undertake individual projects as part of their degree course; this book is a source of constructive practical advice. This new third edition continues the tradition of friendly, well-informed but informal support and continues to focus on answering the specific questions that students typically ask at each stage of the project. The new edition brings the text completely up to date by taking into account changes within the discipline and changes in the ways that students work. New digital media, social networking, mobile technology, e-journals, anti-plagiarism software, ethics approval rules, and risk assessments are among the issues that this new edition takes into account. The new edition also broadens the book's appeal by extending its coverage of the wide range of different approaches to geographical research, with expanded coverage of qualitative research, Geographic Information Systems, and new approaches to research design in both physical and human geographies.

How To Write Up Your Geography Dissertation Daniel Hammett, 2026-03-30 This step-by-step guide to the writing journey of a geography dissertation provides guidance and reassurance on the foundational aspects of the dissertation. This guide will also support students in focussing their time and energy on the substantive components and concerns of their individual work. It is no surprise that the dissertation is often a cause of stress and anxiety for students. Much of this is linked to students' struggles around questions and concerns about how to structure the work, what content should go in which chapter, the purpose, structure, and content of each chapter, how to meet the word limit, and other similar considerations. This text addresses in detail these common areas of concern, covering not only guidance on how to develop a

writing strategy that suits the individual but also guidance on writing style to help students convey their breadth and depth of knowledge within the word limit of a dissertation as well as providing a chapter by chapter guidance on purpose and content Written in a clear accessible and engaging style this detailed guide will empower students to understand and deliver a successful dissertation An invaluable resource for undergraduates it will also reduce the burden on supervisors from commonly asked questions In addition the author presents advice on meeting the expectations of markers and how to use the dissertation in the job market
