Psychological Assessment in South Africa Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. *Psychological Assessment in South Africa* provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists, psychometrists, remedial teachers and human resource practitioners.

Citizenship, Education and Violence Waghid Yusef, 2013-12-30 The focus of this book is to offer a humane response to dealing with violence. An interpretive analysis is presented in order to think differently about violence in schools and about how a citizenship education of becoming can deal with the unpredictable consequences of violence in its own potentiality. It seems to the authors that given the confident onslaught of violence there is nothing left to do but to offer insight into the nature of violence itself and by so doing to search for unexplored ways of humane response and being. The authors are not pretending to hold a magic wand that will sanctify schools into the safe zones that they ought to be and as which they should serve in any society. This would be both presumptuous and misleading. What one is looking and hoping for however is a renewed engagement, a slight tilting of the perspective so that something other than how we have always responded to violence perhaps will emerge. The authors are confident that such a deconstructive approach to violence in schools through the lens of a reconsidered view of citizenship education can assist them and others to wrestle with its potential for destruction that can be changed into options for co belonging of a non violent if not peaceful kind.
