Library at Cornbury, March 1917 Vernon James Watney, 1917 **Debating Humankind's Place in Nature, 1860-2000**

Richard G. Delisle, 2015-07-14 This text the only one of its kind on the market surveys the development of the field of human evolution from its inception through today It provides students with a broad contrast enabling them to fully understand the value and role of current paleoanthropological research Features An historical approach Establishes for students the nature of paleoanthropology through the historical development of the field from 1860 through 2000 and shows students that paleoanthropology is a remarkably progressive field A focus on the debates in the field of human evolution especially the phylogenetic or genealogical debates Analyzes four distinct debates presented separately from their inception to the present

- 1 Humankind s place among the primates
- 2 The place of the australopithecines relative to the human line
- 3 Debates on human phylogeny proper
- 4 Proposed scenarios of hominization

Presentation and analysis of the viewpoints of over 150 scholars Gives students a valuable reference work for the future includes over 1200 references in the bibliography as well as a comprehensive text for today For junior senior courses in Human Evolution and Paleoanthropology in Anthropology departments

The Reception of Darwinian Evolution in Britain, 1859-1909 Martin Hewitt, 2024-10-20 The Reception of Darwinian Evolution in Britain 1859 1909 Darwinism s Generations uses the impact of Charles Darwin s On the Origin of Species 1859 in the 50 years after its publication to demonstrate the effectiveness of a generational framework for understanding the cultural and intellectual history of Britain in the nineteenth century It challenges conventional notions of the Darwinian Revolution by examining how people from across all sections of society actually responded to Darwin s writings Drawing on the opinions and interventions of over 2 000 Victorians drawn from an exceptionally wide range of archival and printed sources it argues that the spread of Darwinian belief was slower more complicated more stratified by age and ultimately shaped far more powerfully by divergent generational responses than has previously been recognised In doing so it makes a number of important contributions It offers by far the richest and most comprehensive account to date of how contemporaries came to terms with the intellectual and emotional shocks of evolutionary theory It makes a compelling case for taking proper account of age as a fundamental historical dynamic and for the powerful generational patternings of the effects that age produced It demonstrates the extent to which the most common sub periodisation of the Victorian period are best understood not merely as constituted by the exigencies of events but are also formed by the shifting balance generational influence Taken together these insights present a significant challenge to the ways historians currently approach the task of describing the nature and experience of historical change and have fundamental implications for our current conceptions of the shape and pace of historical time
