Humor Styles Questionnaire Manual:

Research on Young Children's Humor Eleni Loizou, Susan L. Recchia, 2019-07-24 This book provides a wide spectrum of research on young children's humor and illuminates the depth and complexity of humor development in children from birth through age 8 and beyond. It highlights the work of pioneers in young children's humor research including Paul McGhee, Doris Bergen, and Vasu Reddy. Presenting a variety of new perspectives, the book examines such issues as play, humor, laughing, and pleasure within the context of learning and development. It looks at humor, wordplay, and cartoons that can be used as educational tools in the classroom. Finally, it provides explorations of humor within a cultural and spiritual context. The book presents diverse and creative methods to study humor and provides practical implications for adults working with children. The book offers a powerful springboard for moving research and practice toward a deeper understanding of young children's humor as an integral and meaningful component of early development and learning. Humor as Survival Training for a Stressed-Out World Paul McGhee, 2010-07-14 The evidence is now in: Humor and laughter are good medicine. The companion to this book, *Humor: The Lighter Path to Resilience and Health* (2010, also published by AuthorHouse) discusses the exciting new research supporting the long-held claim that laughter is the best medicine. *Humor as Survival Training for a Stressed Out World* shows how to get these benefits of humor into your own life. It contains the first-ever humor skills training program that has evidence from multiple countries documenting its effectiveness in boosting your sense of humor and learning to use humor to cope with the stress in your life. No other program for improving your sense of humor can make this claim. The basic idea is to build key foundation humor skills on your good days when you're in a good mood. While strengthening one habit/skill at a time, you don't extend these skills to daily stressors until the habits are well developed; otherwise, your sense of humor abandons you when you're under stress. The 7 Humor Habit Program first builds the habit of becoming a more playful person in general; humor is a form of mental play, and then focuses on verbal humor skills: finding humor in everyday life, laughing at yourself, and other key humor skills. Studies in the USA, Switzerland, Australia, and Germany have confirmed the effectiveness of this program in boosting your sense of humor. Evidence also shows that it improves your daily mood, boosts optimism, and improves your ability to cope with stress. There is even evidence that the 7 Humor Habits Program is an effective tool in reducing clinical depression and anxiety. It has been shown to be effective for all ages, from college students to seniors in their eighties. So it's never too late to improve your own sense of humor. Script-Based Semantics Salvatore Attardo, 2020-02-24 The book contains essays in honor of Victor Raskin. The contributions are all directly related to some of the major areas of work in which Raskin's scholarship has spanned for decades. The obvious connecting idea is the encyclopedic script-based foundation of lexical meaning, which informs his pioneering work in semantics in the 1970s and 1980s. The first part of the book collects articles directly concerned with script-based semantics, which examine both the theoretical and methodological premises of the idea and its applications. Script-based semantics is the foundation of

both Raskin's ground breaking work in humor research addressed by the articles in part 2 and in Ontological semantics addressed in part 3 the most recent development of script based semantics The fourth part is dedicated to a less known but equally important strand of Raskin's research the applications of linguistics to other fields including writing lexicography and professional applications e.g. tourism Overall the book provides and up to date in depth discussion of an influential strand of the discussion on semantics and its most recent developments and influence on other seemingly unrelated fields such as Cognitive Linguistics

Humor and Laughter, Playfulness and Cheerfulness: Upsides and Downsides to a Life of Lightness Willibald Ruch, Tracey Platt, René T. Proyer, Hsueh-Chih Chen, 2019-08-12 The emergence of Positive Psychology has highlighted the importance of studying the good life and how to attain it Positive life outcomes such as well being thriving flourishing and happiness were discussed and investigated Among them different orientations to happiness were identified such as a life of pleasure life of meaning and life of engagement Other outcomes such as subjective and objective fulfillment in life or societal recognition have been less studied Among the characteristics that facilitate positive outcomes the VIA classification of strength and virtues distinguishes 24 strengths with humor playfulness being one of them Only a small segment of humor entered the definition of humor as character strengths namely the parts that contain some goodness Humor as a character strength facilitates a lot of positive outcomes such as positive emotions and positive relationships and there is a lightness accompanying humor playfulness The field is broader though and transcends the definition of humor as used in positive psychology in at least two ways First there is actually a family of overlapping but still distinct concepts with different research traditions We include next to humor and types of humor also laughter playfulness and cheerfulness We think that more research is needed on how they do overlap and what makes them distinct Second while positive psychology is interested in the goodness of we do want to stress that there is the need to study the non virtuous parts as well That is laughter may not only be expressing amusement but scorn directed at people humor may be benevolent but there is also sarcasm and playfulness may elicit positive emotions but also risk prone and immature types of behavior Therefore the aim of

this Research Topic was to collect current perspectives on humor playfulness laughter and cheerfulness in both adults and children to study their full diversity but also interrelations and overlapping features to introduce new instruments or ways for their assessment in future studies and to study their causes and consequences in a variety of life domains We encouraged studies on differences due to gender or nationality the embodiment in different groups e g class clowns psychiatric patients or whether or not they can be trained We also welcomed contributions from adjacent disciplines e g education leisure studies or therapy counseling and different regions of the earth The outcome is a set of 33 manuscripts from altogether 101 authors Not all areas are covered and not all aims were met while we made progress there is much left to do In this sense the merging of these topics may be the first milestone but like every milestone it only marks the beginning of a long journey
