Franchising in Brazil aims to contribute to many key issues in the process of democratization of information. With the system being in an increasing development we intend to show that the panorama is accessible to all classes of the economically active country providing opportunities for investors and individuals seeking out to enter the labor market but also for the academic public researchers, journalists, economists, government agencies and individuals among others. Therefore the creation of a work on the entire system in the form of a manual became imperative to present in a dynamic and didactic way how franchising can cause innovation in all economic sectors of the country and showing that everyone has the possibility of investing in franchising and benefit from inside information generated in this sector.
