GOYAL,2017-06-01 Designed for the postgraduate students of mathematics the book on Integral Equations equips the
students with an in depth and single source coverage of the complete spectrum of Integral Equations including the basic
concepts Fredholm integral equations separable and symmetric kernels solutions of integral equations classical Fredholm
theory integral transform method and so on Divided into eight chapters the text addresses the doubts and concerns of the
students Examples given in the chapters inculcate the habit to try to solve more and more problems based on integral
equations and create confidence in students Bridging the gap between theory and practice the book offers Clear and concise
presentation Systematic discussion of the concepts Numerous worked out examples to make the students aware of problem
solving methodology Sufficient exercises containing ample unsolved questions along with their answers Practice questions
