June 2014 Math Paper:

2024-25 TGT/PGT Economics Solved Papers YCT Expert Team , 2024 25 TGT PGT Economics Solved Papers **2025-26 TGT/PGT History Solved Papers** YCT Expert Team , 2025 26 TGT PGT History Solved Papers 1056 995 E This book contains 173 sets of the previous solved papers **Mathematical Modelling and Numerical Simulation of Oil Pollution Problems** Matthias Ehrhardt,2015-03-10 Written by outstanding experts in the fields of marine engineering atmospheric physics and chemistry fluid dynamics and applied mathematics the contributions in this book cover a wide range of subjects from pure mathematics to real world applications in the oil spill engineering business Offering a truly interdisciplinary approach the authors present both mathematical models and state of the art numerical methods for adequately solving the partial differential equations involved as well as highly practical experiments involving actual cases of ocean oil pollution It is indispensable that different disciplines of mathematics like analysis and numerics together with physics biology fluid dynamics environmental engineering and marine science join forces to solve today s oil pollution problems The book will be of great interest to researchers and graduate students in the environmental sciences mathematics and physics showing the broad range of techniques needed in order to solve these pollution problems and to practitioners working in the oil spill pollution industry offering them a professional reference resource **Equity Derivatives and Hybrids** Oliver Brockhaus,2016-04-29 Since the development of the Black Scholes model research on equity derivatives has evolved rapidly to the point where it is now difficult to cut through the myriad of literature to find relevant material Written by a quant with many years of experience in the field this book provides an up to date account of equity and equity hybrid equity rates equity credit equity foreign exchange derivatives modeling from a practitioner s perspective The content reflects the requirements of practitioners in financial institutions Quants will find a survey of state of the art models and guidance on how to efficiently implement them with regards to market data representation calibration and sensitivity computation Traders and structurers will learn about structured products selection of the most appropriate models as well as efficient hedging methods while risk managers will better understand market credit and model risk and find valuable information on advanced correlation concepts Equity Derivatives and Hybrids provides exhaustive coverage of both market standard and new approaches including Empirical properties of stock returns including autocorrelation and jumps Dividend discount models Non Markovian and discrete time volatility processes Correlation skew modeling via copula as well as local and stochastic correlation factors Hybrid modeling covering local and stochastic processes for interest rate hazard rate and volatility as well as closed form solutions Credit debt and funding valuation adjustment CVA DVA FVA Monte Carlo techniques for sensitivities including algorithmic differentiation path recycling as well as multilevel Written in a highly accessible manner with examples applications research and ideas throughout this book provides a valuable resource for quantitative minded practitioners and researchers **Information and Software Technologies** Giedre Dregvaite,Robertas

Damasevicius,2016-09-29 This book constitutes the refereed proceedings of the 22nd International Conference on Information and Software Technologies ICIST 2016 held in Druskininkai Lithuania in October 2016 The 61 papers presented were carefully reviewed and selected from 158 submissions The papers are organized in topical sections on information systems business intelligence for information and software systems software engineering information technology applications

Bulletin of the American Mathematical Society ,2014-10 Stopping the Spies Jane Duncan,2018-06-01 Is South Africa on its way to becoming a surveillance state and will it need a whistleblower In 2013 former National Security Agency NSA contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens International outrage resulted but the Snowden documents revealed only the tip of the surveillance iceberg Apart from insisting on their rights to tap into communications more and more states are placing citizens under surveillance tracking their movements and transactions with public and private institutions The state is becoming like a one way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does owing to high levels of secrecy around surveillance In this book Jane Duncan assesses the relevance of Snowden s revelations for South Africa In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state Duncan challenges members of civil society to be concerned about and to act on the ever expanding surveillance capacities of the South African state Is surveillance used for the democratic purpose of making people safer or is it being used for the repressive purpose of social control especially of those considered to be politically threatening to ruling interests She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses

Modeling Individual Differences in Perceptual Decision Making Joseph W. Houpt,Cheng-Ta Yang,James T. Townsend,2017-01-18 To deal with the abundant amount of information in the environment in order to achieve our goals human beings adopt a strategy to accumulate some information and filter out other information to ultimately make decisions Since the development of cognitive science in the 1960s researchers have been interested in understanding how human beings process and accumulate information for decision making Researchers have conducted extensive behavioral studies and applied a wide range of modeling tools to study human behavior in simple detection tasks and two choice decision tasks e g discrimination classification In general researchers often assume that the manner in which information is processed for decision making is invariant across individuals given a particular experimental context Independent variables including speed accuracy instructions stimulus properties i e intensity and characteristics of the participants i e aging cognitive ability are assumed to affect the parameters in a model i e speed of information accumulation response bias but not the way that participants process information e g the order of information processing Given these assumptions much modeling has been accomplished based on the grouped data rather than the individual data However a growing number of studies have

demonstrated that there were individual differences in the perceptual decision process In the same task context different groups of the participants may process information in different manners The capacity and architecture of the decision mechanism were found to vary across individuals implying that humans decision strategies can vary depending on the context to maximize their performance In this special issue we focused on a particular subset of cognitive models particularly accumulator models multinomial processing trees and systems factorial technology SFT as applied to perceptual decision making The motivation for the focus on perceptual decision making is threefold Empirical studies of perception have grown out of a history of making a large number of observations for each individual so as to achieve precise estimates of each individual s performance This type of data rather than a small number of observations per individual is most amenable to achieving precision in individual level and group level cognitive modeling Second the interaction between the acquisition of perceptual information and the decisions based on that information to the extent that those processes are distinguishable offers rich data for scientific exploration Finally there is an increasing interest in the practical application of individual variation in perceptual ability whether to inform perceptual training and expertise or to guide personnel decisions Although these practical applications are beyond the scope of this issue we hope that the research presented herein may serve as the foundation for future endeavors in that domain
