Learning to Teach Neville Bennett,Clive Carre,2002-01-31 The Leverhulme Primary Project reported here provides for the first time evidence on what is actually happening in teacher education today and on how novice teachers learn their craft The book looks in detail at the experience of all the student teachers on one post graduate primary teacher training course and of those responsible for them in their university and in schools It tracks them as they work to acquire the appropriate subject and pedagogical knowledge and as their own beliefs about teaching develop during the course A final section follows some of the students through their first year as qualified teachers Teacher education is going through a period of radical change and more people than ever before now have some responsibility whether in higher education or in school for the training of teachers None of them can afford to ignore the fresh insights into how teachers are made contained in this book
