Telephone Engineer & Management ,1977      Global Mobile Satellite Communications Applications Stojce Dimov  
 Ilcev,2017-11-11 This book discusses global mobile satellite communications GMSC for maritime land road and rail and  
 aeronautical applications It covers how these enable connections between moving objects such as ships road and rail vehicles  
 and aircrafts on one hand and ground telecommunications subscribers through the medium of communications satellites  
 ground earth stations Terrestrial Telecommunication Networks TTN Internet Service Providers ISP and other wireless and  
 landline telecommunications providers The new edition covers new developments and initiatives that have resulted in land  
 and aeronautical applications and the introduction of new satellite constellations in non geostationary orbits and projects of  
 new hybrid satellite constellations The book presents current GMSC trends mobile system concepts and network architecture  
 using a simple mode of style with understandable technical information characteristics graphics illustrations and  
 mathematics equations It represents telecommunications technique and technology which can be useful for all technical staff  
 on vessels at sea and rivers on all types of land vehicles on planes on off shore constructions and for everyone possessing  
 satellite communications handset phones The first edition of Global Mobile Satellite Communications Springer 2005 was split
