MATTER

All substances in the universe are made up of matter. Not all matter is made up of tiny little things called particles.

How particles behave differently depending on what state they are in.

There are three different states of matter they are Solid, Liquid and Gas.

In a solid the particles pack closely together. They are packed into a tight little box so they don't move.

States of matter	The physical forms of a substance	Solid, liquid, gas, plasma
Solid	Particles are close together, and vibrate in place, strong attraction to each other	
Liquid	Particles are close together, but can slide past each other, move fast enough to overcome attraction	
Gas	Particles move independently and collide frequently, move very fast	
Plasma	Particles have broken apart
