Fce Past Papers 2012:

Teacher Involvement in High-Stakes Language Testing Daniel Xerri, Patricia Vella Briffa, 2018-04-27 This book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement This is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices The book also considers the arguments against teacher involvement e.g the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable Using contributions from a wide range of international educational contexts the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy Moreover teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices High stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers which ultimately benefits all their students Classroom-based Assessment in L2 Contexts Dina Tsagari, 2016-06-22 This edited volume addresses issues that promote the notion of Classroom based Language Assessment CBLA for the academic community and beyond The book explores recent thinking and research on CBLA within the fields of language testing assessment and general education based on theoretical and research papers presented at the recent CBLA SIG EALTA Symposia held in Cyprus and the pre conference EALTA workshops in various countries around Europe The volume contains 17 chapters which involve both high stakes tests and classroom based assessments conducted by academics professionals and researchers in the field It brings together high quality submissions that cover a gap in a research area that has long been in need of theoretical and empirical attention Overall this edited collection with its international scope offers a ground breaking resource bringing together in balanced relationship the fields of education and second language testing and assessment **Treaty on the Functioning of the European Union - A Commentary** Robert Böttner, Hermann-Josef Blanke, 2024-06-07 The Commentary on the Treaty on the Functioning of the European Union four volumes is a major European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to the creation of Europeanised research on Union law Following on from the Commentary on the Treaty on European Union this book presents detailed explanations article by article of all the provisions of the TFEU discussing the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU The authors are academics and practitioners from all across Europe and different legal traditions some from a constitutional law background others experts in the field of international law and EU law Reflecting the various approaches to European
