Ettington, In our modern society there are lots of pressures to succeed Whatever that means Most of us absorb the idea that we need to succeed in life and thus they have the corollary fear of failure One of my favorite movies is The Razor's Edge with Tyrone Powell It is the story of a young man in the 1920s who has the opportunity to make it big in conventional jobs but he isn't interested Instead he follows an alternative path which leads him to India where he seeks enlightenment His friends who followed the conventional career path experienced terrible lives when most of them were wiped out in the great depression Even one who made it big financially was mainly interested in earthly status which doesn't make a difference in the long run My point is that we need to be thoughtful about how we envision the future of our lives so we live life with meaning and don't have unrealistic expectations Thinking about life this way is the first way to avoid having a fear of failure In this book we review the reasons people have fears of failure persons who changed failure into success and how to modify our lives to change our fears of failure into a path for success and happiness *A Psychological Approach to Entrepreneurship* Dean A. Agostini ,Donatella Di Corrado,2026-03-05 Success in competitive sports depends primarily on athletes skills personality and motivation Many

studies have investigated the determinants of success. The presence of the zeitgeist social cognitive perspective in psychology has shifted the focus to motivation in top sports. Social cognitive approaches have become the primary framework for researching almost everything in psychology. Despite extensive discussion and research on the relationship between motivation and personality characteristics, there is still a lack of evidence connecting psychological preparation, pre-competitive states, and psychological techniques to sports success and efficiency. There is still a gap in determining which psychological approaches and mental techniques contribute to success in top sports. Different regression models are expected to explore the determinants of success by comparing males and females, as well as young athletes versus top athletes. The final formula for success is still undefined regarding the importance of pre-competitive states, psychological preparation, technical skills, and knowledge. Techniques of psychological preparation, such as hypnosis, visualization, or cognitive stress coping techniques, are not clearly defined and discussed. Therefore, addressing this gap is crucial. The following goals should be discussed: Psychological factors contributing to success in top sports; motivational variables contributing to success in top sports; personality structures contributing to top achievements; stress and coping strategies in top sports; the use of psychological preparation and its relation to top achievement in sports; evidence-based research on specific psychological preparation techniques and their effectiveness in helping athletes achieve top performances; pre-competition states and their relation to success in top sports; differences in psychological characteristics contributing to top achievements between males and females and between youth athletes and top athletes; important factors in the development of motivation for success in athletes; ethics and strategies to emphasize fair play in top sports; the era of COVID-19 and its relationship to success in top sports, including correlation with specific psychological factors. Researchers are invited to submit original research to contribute to this topic. We also welcome brief research reports, systematic reviews, and meta-analyses, reviews, and theoretical articles. By understanding the factors contributing to success in top athletes, we can develop strategies to improve their results and effectiveness.
