*Contested Holy Cities* Michael Dumper,2019-05-14 Examining contestation and conflict management within holy cities this book provides both an overview and a range of options available to those concerned with this increasingly urgent phenomenon In cities in India the Balkans and the Mediterranean we can see examples where religion plays a dominant role in urban development and thus provides a platform for conflict Powerful religious hierarchies the generation of often unregulated revenues from donations and endowments the presence of holy sites and the enactment of ritualistic activities in public spaces combine to create forms of conflicts which are arguably more intense and more intractable than other forms of conflicts in cities The book develops a working definition of the urban dimension of religious conflicts so that the kinds of conflicts exhibited can be contextualised and studied in a more targeted manner It draws

together a series of case studies focusing on specific cities the kinds of religious conflicts occurring in them and the international structures and mechanisms that have emerged to address such conflicts Combining expertise from both academics and practitioners in the policy and military world this interdisciplinary collection will be of particular relevance to scholars and students researching politics and religion regional studies geography and urban studies It should also prove useful to policymakers in the military and other international organisations
