

# GED Study Guide

## SCIENCE

### What you need to know about the GED® Science Test

- 1** You should be familiar with basic science concepts, but you're not expected to have in-depth knowledge of each topic.  
Remember, the science test is not a memorization test! You don't need to know the entire periodic table of elements or the number of bones in the human body.
- 2** You'll need to understand science concepts, use logic and reasoning to interpret information, and draw conclusions (which is using your critical thinking skills in science).  
This study guide and the example questions in it will help you get an idea of what's going to be on the test.
- 3** You don't need to know everything in this guide!  
If you want to see how close you are to passing, the GED Ready® official practice test is a great way to help you determine if you're ready.

### Test Overview

#### Topics

Reading for Meaning in Science  
Designing and Interpreting Science Experiments  
Using Numbers and Graphics in Science

#### Time (to take the test)

90 minutes  
No Breaks

#### Format

Calculator Allowed
