Høgetveit Berg,Arnold Otto,2023-04-03 While both regular canons and monasticism with its development into different
orders have reached a roughly even level of coverage in research the history of secular canons is a field which has hitherto
been far less in focus of historian scholarship This might be due to the fact that they did not form orders or congregations
offering a systematic approach to their institutions Hence the pieces of research carried out so far mostly deal with a single
cathedral or collegiate chapter and do not expand on the phenomenon in general Likewise the present publication may not
give a comprehensive survey but yet takes a comparative approach by regarding the establishment of secular canons in a
European longitudinal section from the Polar Circle to Southern Italy In this course both cathedral and collegiate chapters in
Scandinavian German Polish and Italian territories and the respective career paths canons took into them will be considered
In this course the essays take only some brief recourses to the early middle ages when canons maintained a cloistered vita
communis but rather turn their view to those centuries in the high and later middle ages up to reformation times when the
chapters reached their full implementation The essays collected in this volume base on a session series held at the
International Medieval Congress 2018 in Leeds The contributors are renowned historians in this field Antonio Antonetti
