Butler, 2016-01-01 Long considered the standard for honors and high level mainstream general chemistry courses PRINCIPLES OF MODERN CHEMISTRY continues to set the standard as the most modern rigorous and chemically and mathematically accurate text on the market This authoritative text features an atoms first approach and thoroughly revised chapters on Quantum Mechanics and Molecular Structure Chapter 6 Electrochemistry Chapter 17 and Molecular Spectroscopy and Photochemistry Chapter 20 In addition the text utilizes mathematically accurate and artistic atomic and molecular orbital art and is student friendly without compromising its rigor End of chapter study aids focus on only the most important key objectives equations and concepts making it easier for students to locate chapter content while applications to a wide range of disciplines such as biology chemical engineering biochemistry and medicine deepen students understanding of the relevance of chemistry beyond the classroom

Holt Chemistry Holt Rinehart & Winston, 2003-01-24 *Intermolecular Forces* Pierre L. Huyskens, Werner A.P. Luck, Therese Zeegers-Huyskens, 2012-12-06 The study of intermolecular forces began over one hundred years ago in 1873 with the famous thesis of van der Waals In recent decades knowledge of this field has expanded due to intensive research into both its theoretical and the experimental aspects This is particularly true for the type of very strong cohesive force stressed in 1920 by Latimer and Rodebush the hydrogen bond a phenomenon already outlined in 1912 by Moore and Winemill Hydrogen bonds exert a profound influence on most of the physical and chemical properties of the materials in which they are formed Not only do they govern viscosity and electrical conductivity they also intervene in the chemical reaction path which determines the kinetics of chemical processes The properties of chemical substances depend to a large extent on intermolecular forces In spite of this fundamental fact too little attention is given to these properties both in research and in university teaching For instance in the field of pharmaceutical research about 13000 compounds need to be studied in order to find a single new product that can be successfully marketed The recognition of the need to optimize industrial research efficiency has led to a growing interest in promoting the study of inter molecular forces Rising salary costs in industry have encouraged an interest in theoretical ideas which will lead to tailor made materials

Understanding Chemistry through Cars Geoffrey M. Bowers, Ruth A. Bowers, 2014-11-03 As the car anticipates its dance around the racetrack the engine growls and pops and all senses become immersed in the smell of exhaust vapors and the sounds of raw speed and excitement As it turns out these also are the sights sounds and smells of chemistry The car is a great example of an everyday device with an abundance of chemistry

Molecular Materials with Specific Interactions - Modeling and Design W. Andrzej Sokalski, 2007-05-06 Molecular Materials with Specific Interactions Modeling and Design has a very interdisciplinary character and is intended to provide basic information as well as the details of theory and examples of its application to experimentalists and theoreticians interested in modeling molecular properties and putting into practice rational design of

new materials One of the first requirements to initiate the molecular modeling of molecular materials is an accurate and realistic description of the electronic structure intermolecular interactions and chemical reactions at microscopic and macroscopic scale Therefore the first four chapters contain an extensive introduction into the latest theories of intermolecular interactions functional density techniques microscopic and mezosopic modeling techniques as well as first principle molecular dynamics In the following chapters techniques bridging microscopic and mezosopic modeling scales are presented The authors then illustrate various successful applications of molecular design of new materials drugs biocatalysts etc before presenting challenging topics in molecular materials design *Holt Chemistry* Ralph Thomas Myers,2004
