of organisations and companies In addition Agency Theory is used to explore relations between stakeholders in politics and the economy This study first elaborates upon the applicability of Principal Agent Theory in POEs in Kosovo and then identifies the presence of principal agent problems and identifies the nexus between such problems and poor performance of POEs Identification of principal agent problems may help to identify the reason for poor performance of POEs and the lack of transparency accountability and supervision POEs are subsidised by the state on an annual basis which makes the identification of problems in having profitable POEs important for public interests too Such importance is due not only to the fact that POEs are financed by taxpayers but also to the fact that they are supposed to provide services in public interests by being self sustainable and profitable for the government as a shareholder The study aims to conclude that principal agent problems such as capture rent seeking moral hazard information asymmetry and adverse selection are present in POEs in Kosovo and that they have a negative impact on their performance Such principal agent problems and their negative performance may also be influenced by gaps in legislation and weak law enforcement Commercial and Financial Chronicle Bankers Gazette, Commercial Times, Railway Monitor and Insurance Journal ,1878 **The Commercial and Financial Chronicle** ,1923 **IMO News** ,2013 **Sessional Papers of the Dominion of Canada** Canada.
