management system is to ensure proportionality of development support and preservation of social guarantees for employees. However, after the Russian Federation started military operations on the territory of Ukraine, agricultural enterprises experienced major problems in production, sales, and procurement of inputs. The big problems caused by the war are clearly visible in logistics processes, losses in trade relations by sea, suspended river traffic, heavy load on border crossing points, railways, and highways, and lack of air traffic. Due to the constant bombardment by the Russian aggressor, a large number of critical infrastructure facilities have been damaged, forcing our companies to significantly increase the cost of processing agricultural products and thus stay afloat without stopping their operations. A large number of companies from the east and south were forced to move to the western and central parts of the country to resume their operations. However, given that in Ukraine, marketing management of agricultural enterprises is a separate, very large, and problematic aspect, the theoretical and methodological framework is not sufficiently covered; there are problematic issues, and the strategy for the transition of enterprises from outdated forms and methods of management and business to new scientifically based market methods, such as marketing management, has not been developed. This will allow our enterprises to develop and meet the needs of consumers and at the same time ensure the country's food security in this difficult military period for Ukraine.
