*Learning Progressions in Science* Alicia C. Alonzo, Amelia Wenk Gotwals, 2012-07-30 Learning progressions descriptions of increasingly sophisticated ways of thinking about or understanding a topic National Research Council 2007 represent a promising framework for developing organized curricula and meaningful assessments in science In addition well grounded learning progressions may allow for coherence between cognitive models of how understanding develops in a given domain classroom instruction professional development and classroom and large scale assessments Because of the promise that learning progressions hold for bringing organization and structure to often disconnected views of how to teach and assess science they are rapidly gaining popularity in the science education community However there are significant challenges faced by all engaged in this work In June 2009 science education researchers and practitioners as well as scientists psychometricians and assessment specialists convened to discuss these challenges as part of the Learning Progressions in Science LeaPS conference The LeaPS conference provided a structured forum for considering design decisions entailed in four aspects of work on learning progressions defining learning progressions developing assessments to elicit student responses relative to learning progressions modeling and interpreting student performance with respect to a learning progression and using learning progressions to influence standards curricula and teacher education This book presents specific examples of learning progression work and syntheses of ideas from these examples and discussions at the LeaPS
