- 1) What are the three elements that require integration to be successful in operations and supply chain management?

- Strategy, processes, and analytics

Explanation on why it is the answer: Strategy involves the long-range planning to guide the firm through future operations. Processes actually produce and deliver the goods and services to market. Analytics support good decision making and allow the firm to judge how well the processes are working. All three must be properly integrated for success in OSCM.

- 2) Operations and supply chain management is concerned with the design and management of the entire system that has what function?

- Creates and delivers a firm's products and services

Cost of goods sold	12,600,000
Total assets	10,550,000
Inventory	2,875,000
Receivables	3,445,000

A) Compute the *profit margin*. **Note: Round your answer to 3 decimal places.**
