\* See Specifications for information on speeds. Starlink users typically see download speeds between 20 and 200 Mbps, with most users seeing speeds over 100 Mbps, and upload speeds between 5 and 20 Mbps. Performance varies based on location, time of day and the pricing associated with your service plan. Latency ranges between 20 and 50ms in most regions on land, and on the ocean latency can reach 200ms. During times of peak network congestion or times of high data consumption, speeds can decrease below these values.  
 † Priority and Priority Mobile users will be given network precedence over Standard users, and Standard users over Mobile users. Higher network priority users will experience faster and more consistent download and upload speeds, especially during times of peak use. See Starlink Policy for more information.  
 ‡ Mobile Priority use on the ocean or in motion is dependent on country authorization. See approved markets (app). In-motion use is only designed for Flat High-Performance hardware and is approved countries, as seen in (app).
