## Everfi Modules 1 9:

**Financial Education in U.S. State Colleges and Universities** Donna E. Danns, 2015-11-28 This book addresses the uncertain state of financial literacy among today's college students and examines steps colleges and universities are taking to address this widespread concern. This work introduces a four-fold typology of organizational models for college-based financial education programs and uses these as optics for grouping and presenting case studies. The case studies presented provide a holistic representation of how universities develop, sustain, and grow financial education programs. Details on the nature of programs, goals, administrative support, resources, partnerships, scale of operations, program content, and delivery, advertising, evaluation, program spinoffs, and much more are captured in this work. In addition to detailed case studies, this book presents general findings on the availability of and delivery modes for college-based financial education. This work has significant utility for universities and colleges seeking to implement new financial education programs, change existing programs, improve program relevancy, or expand program delivery on campus. It is an important contribution to the experiential understanding on how college students as consumers can acquire financial education as part of their broader college curricula and be able to better manage their financial lives. Included in the coverage: The financial literacy imperative, Program delivery and organizational models in state colleges and universities, The academic model, The full-fledged money management center, The aspirational seed program, The branch interspersed model. As financial literacy is increasingly recognized as a core life skill, it becomes more crucial as a component of higher education. *Personal Financial Education in State Colleges and Universities in the U.S.* is salient reading for college and university administrators, researchers, social workers, and mental health professionals working with college students, policy analysts, and faculty from any discipline interested in promoting the financial literacy of their students. [Quality Assessment and Enhancement in Higher Education in Africa](#) Peter Neema-Abooki, 2022-12-16 This book explores quality assessment and enhancement in higher education in Africa to illustrate the need to develop quality practices in measuring effective education and continually search for permanent improvement. The book demonstrates that technological and socio-economic trends, innovations, and inventions of the twenty-first century demand that additional attention be placed upon education for national, regional, and international development. Since conventions for quality assessment and enhancement need to be defined and systematic structures constructed to develop quality practices, the book shows how quality in higher education within Africa has been established and advanced to provide a framework for monitoring, auditing, and reviewing assessment and enhancement. Though the book considers African complexities and diversity, it incorporates global trends and utilizes an international focus that enables readers to devise appropriate strategies for developing and enhancing quality and standards in higher education in both continental Africa and beyond. Illustrating why quality assessment and enhancement should be embraced in all aspects, including inputs, processes, outputs, and outcomes in educational settings globally, this book will be of interest to policymakers.
