O: Opening
M: Materials
P: Procedure
A: Assessment
Differentiation

4.3 Favorite Color Graph

O: TLWBAT classify, count, and order categories by count

V: all, bar graph, fewer, graph, lease, less, more, most, none, some

M: graph, squares of paper

P: Teacher will give each child a piece of white paper and all

children will color the paper their favorite color. When finished,

sort the children according to color. Ask: *How can we find the most popular color?*

Class will count each color group. Ask about a color not picked. (remind children that 0

represents none.)

Prompt discussion:

How could we share with others what we learned about our favorite colors? How can we save

this information so we could talk about it another day? or compare it with another class?

Suggest creating a graph. Class will decide what to title the graph and what the axes will say.

Conclude by counting all colors and discussing: *most popular, least, how many more than,*

what does this tell us, why do we use title and labels, if we compared another class...do you

think it will be the same?

Have class graphs and record findings.

A: teacher observation, graph

Differentiation: higher order questions (Ex: how many green and red are there?), small group

instruction as needed, repeat and rephrase directions, provide visuals and additional teacher

modeling

4.5 Ten Frame Quick Looks

O: TLWBAT understand addition by decomposing numbers on a ten frame.

TLWBAT match groups to their numeral by playing a memory game.

M: Smart board, ten frame and number cards - math masters G8.9, 18, 19

P: Display smart board. Explain that we will take a quick look at ten frames and describe what

we see. Students will identify the number and then discuss ways to decompose the numbers on

the frame. SW then play a game matching ten frames and numerals.

A: Teacher Observation, Game play using checklist

Differentiation: Small group instruction as needed, repeat and rephrase directions, provide

visuals and additional teacher modeling
