Creation: "Behold, it was very good." Richard Schaefer, 2019-10-28 Author Richard A Schaefer was a lifelong communicator fascinated by stories and like any good journalist dug for the facts and verified sources exploring nagging questions such as Is creation or evolution more credible based on science and expert opinions This book truly represented a personal passion of looking at all sides of the CREATION vs EVOLUTION issue He called on many experts and theorists including Charles Darwin himself Surprisingly Darwin was far more skeptical of his own theories than are many PhDs today and admitted to significant holes in his logic Read for yourself as great thinkers explore the pros and cons of both theories and their variants

Dobrovolskaya, 2014-05-30 In this latest volume in the Human Evolution Series Erik Trinkaus and his co authors synthesize the research and findings concerning the human remains found at the Sunghir archaeological site It has long been apparent to those in the field of paleoanthropology that the human fossil remains from the site of Sunghir are an important part of the human paleoanthropological record and that these fossil remains have the potential to provide substantial data and inferences concerning human biology and

behavior both during the earlier Upper Paleolithic and concerning the early phases of human occupation of high latitude continental Eurasia. But despite many separate investigations and published studies on the site and its findings a single and definitive volume does not yet exist on the subject. This book combines the expertise of four paleoanthropologists to provide a comprehensive description and paleobiological analysis of the Sunghir human remains. Since 1990 Trinkaus et al. have had access to the Sunghir site and its findings and the authors have published frequently on the topic. The book places these human fossil remains in context with other Late Pleistocene humans utilizing numerous comparative charts, graphs, and figures. As such, the book is highly illustrated in color. Trinkaus and his co-authors outline the many advances in paleoanthropology that these remains have helped to bring about examining the Sunghir site from all angles. *Federation Proceedings* Federation of American Societies for Experimental Biology, 1983 **A Guide to Science Reading** Hilary J.
