The Rise of Africa's Middle Class Henning Melber,2016-12-15 Across Africa a burgeoning middle class has become the poster child for the Africa rising narrative Ambitious aspirational and increasingly affluent this group is said to embody the values and hopes of the new Africa with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change This narrative however obscures the complex and

often ambiguous role that this group actually plays in African societies Bringing together economists political scientists anthropologists and development experts and spanning a variety of case studies from across the continent this collection provides a much needed corrective to the received wisdom within development circles and provides a fresh perspective on social transformations in contemporary Africa The Transnationalized Social Question Thomas Faist,2018-11-30 The social question is back Yet today s social question is not primarily between labour and capital as it was in the nineteenth century and throughout much of the twentieth The contemporary social question is located at the interstices between the global South and the global North It finds its expression in movements of people seeking a better life or fleeing unsustainable social political economic and ecological conditions It is transnationalized not only because migrants and their significant others entertain ties across the borders of national states staying in touch with family and friends receiving or sending financial remittances in transnational social spaces Also of importance are cross border recruitment schemes for workers and the cross border diffusion of norms appealed to in the case of migration for example the social right to decent work as a human right Moreover migration can become an issue of inclusion or exclusion in fields important to life chances in the emigration transit or immigration states a transnationalization of national states And as in the nineteenth century political conflicts arise constituting the social question as a public concern In earlier periods class differences dominated conflicts While class has always been criss crossed by manifold heterogeneities not least of all cultural ones around ethnicity religion and language it is these latter heterogeneities that have sharpened in situations of immigration and emigration over the past decades Casting a wide net in terms of conceptual and empirical scope this book tackles both the social structure and the politics of social inequalities It sets a comprehensive agenda for research which also includes the public role of social scientists in dealing with the transnationalized social question Globalization and Labour in the Twenty-First Century Verity Burgmann,2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license Globalization has adversely affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital However workers around the world are challenging their increased exploitation by globalizing corporations In developed countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances in developing countries militant new labour movements are emerging Drawing upon insights in anti-determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or

political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work **The Middle Class in Neo-Urban India** Smriti Singh,2023-11-17 This book critically examines the new middle class and the emergence of neo urban spaces in India within the context of rapid urbanisation and changing socio spatial dynamics in urban areas in the country It looks at class as a socio spatial category where class distinction is tied to and manifests itself through the space of the city With a detailed ethnographic study of the national capital region of Delhi especially Gurugram it explores themes such as class subjectivity morality and social beliefs life inside gated enclaves family and everyday practices of class reproduction and the process of othering and exclusivity among others Class identity vulnerability and hierarchy influence the actions and motivations of the middle class The author studies the nuances and socio political fractures stemming from the complex dynamic of class caste religion and gender that manifest in these neo urban spaces and how these shape the city and community Rich in empirical resources this book will be of interest to scholars and researchers of sociology political sociology ethnography urban sociology urban studies and South Asian studies Yearbook of International Organizations 2014-2015, Volumes 1A And 1B (SET) Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events *Baltimore Bulletin of Education* ,1930
