Manuale di diritto privato Guido Alpa, 2023 [Manuale di diritto privato \(diritto civile\)](#) Massimiliano Di Pirro, 2022

A History of International Law in Italy Giulio Bartolini, 2020-04-02 This volume critically reassesses the history and impact of international law in Italy. It examines how Italy's engagement with international law has been influenced and cross-fertilized by global dynamics in terms of theories, methodologies, or professional networks. It asks to what extent historical and political turning points influenced this engagement, especially where scholars were part of broader academic and public debates or even active participants in the role of legal advisers or politicians. It explores how international law was used or misused by relevant actors in such contexts. Bringing together scholars specialized in international law and legal history, this volume first provides a historical examination of the theoretical legal analysis produced in the Italian context, exploring its main features and dissident voices. The second section assesses the impact on international law studies of key historical and political events involving Italy, both internationally and domestically, and conversely how such events influenced perceptions of international law. Finally, a concluding section places the preceding analysis within a broader contemporary perspective. This volume weighs in on the growing debate on the need to explore international law from comparative and local viewpoints. It shows how regional, national, and local contexts have contributed to shaping international legal rules, institutions, and doctrines, and how these in turn influenced local solutions. **Manuale della procedura civile** Lodovico Mortara, 1887

The Principles of European Contract Law Ole Lando, 2023-09-29 An arbitrator has to decide a case under a contract to be governed by internationally accepted principles of law. A business person is negotiating a contract with a company in another EU state but neither party wishes to apply the law of the other party's country. A lawyer is advising parties to contracts involving parties in other States. An EU official is drafting a new Directive affecting contracts. A professor of law wants her students to gain a solid understanding of the way in which contracts are treated by the laws of the different Member States and to understand the common principles. All these need to know the fundamental principles of contract law shared by the legal systems of the Member States and to have a concise, comprehensive, and workable statement of them. The Principles of European Contract Law provides this. The Principles have been drawn up by an independent body of experts from each Member State of the EU under a project supported by the European Commission and many other organisations. The Principles are stated in the form of articles with a detailed commentary explaining the purpose and operation of each article and its relation to the remainder. A particularly valuable feature is that each article also has extensive comparative notes surveying the national laws and other international provisions on the topic. The Principles of European Contract Law Parts I-II covers the core rules of contract formation, authority of agents, validity, interpretation, contents, performance, non-

performance and remedies The articles previously published in Part I 1995 are included in a revised and re ordered form
