Microfluidics: Modeling, Mechanics and Mathematics Bastian E. Rapp, 2016-12-01 This practical lab based approach to nano and microfluidics provides readers with a wealth of practical techniques protocols and experiments ready to be put into practice in both research and industrial settings The practical approach is ideally suited to researchers and R additionally the interdisciplinary approach to the science of nano and microfluidics enables readers from a range of different academic disciplines to broaden their understanding Dr Rapp fully engages with the multidisciplinary nature of the subject Alongside traditional fluid transport topics there is a wealth of coverage of materials and manufacturing techniques chemical modification surface functionalization biochemical analysis and the biosensors involved As well as providing a clear and concise overview to get started into the multidisciplinary field of microfluidics and practical guidance on techniques pitfalls and troubleshooting this book supplies A set of hands on experiments and protocols that will help setting up lab experiments

but which will also allow a quick start into practical work A collection of microfluidic structures with 3D CAD and image data that can be used directly files provided on a companion website A practical guide to the successful design and implementation of nano and microfluidic processes e g biosensing and equipment e g biosensors such as diabetes blood glucose sensors Provides techniques experiments and protocols ready to be put to use in the lab in an academic or industry setting A collection of 3D CAD and image files is provided on a companion website

Intelligent Computer Mathematics James H. Davenport, William M. Farmer, Florian Rabe, Josef Urban, 2011-07-18 This book constitutes the joint refereed proceedings of three international events namely the 18th Symposium on the Integration of Symbolic Computation and Mechanized Reasoning Calculemus 2011 the 10th International Conference on Mathematical Knowledge Management MKM 2011 and a new track on Systems and Projects descriptions that span both the Calculemus and MKM topics all held in Bertinoro Italy in July 2011 All 51 submissions passed through a rigorous review process A total of 15 papers were submitted to Calculemus of which 9 were accepted Systems and Projects track 2011 there have been 12 papers selected out of 14 submissions while MKM 2011 received 22 submissions of which 9 were accepted for presentation and publication The events focused on the use of AI techniques within symbolic computation and the application of symbolic computation to AI problem solving the combination of computer algebra systems and automated deduction systems and mathematical knowledge management respectively

Biomedical Engineering, Trends in Electronics Anthony Laskovski, 2011-01-08 Rapid technological developments in the last century have brought the field of biomedical engineering into a totally new realm Breakthroughs in material science imaging electronics and more recently the information age have improved our understanding of the human body As a result the field of biomedical engineering is thriving with new innovations that aim to improve the quality and cost of medical care This book is the first in a series of three that will present recent trends in biomedical engineering with a particular focus on electronic and communication applications More specifically wireless monitoring sensors medical imaging and the management of medical information
