*Reclaiming Personalized Learning* Paul Emerich France, 2019-10-01 Where exactly did personalized learning go so wrong For teacher and consultant Paul France at first technology powered personalized learning seemed like a panacea But after three years spent at a personalized learning start up and network of microschoools he soon realized that such corporate driven individualized learning initiatives do more harm than good especially among our most vulnerable students The far superior alternative A human centered pedagogy that prioritizes children over technology First let's be clear Reclaiming Personalized Learning is not yet another ed tech book Instead it's a user's guide to restoring equity and humanity to our classrooms and schools through personalization One part polemical eleven parts practical the book describes how to Shape whole class instruction leverage small group interactions and nurture a student's inner dialogue Cultivate awareness within and among students and build autonomy and authority Design curriculum with a flexible frame and where exactly the standards fit Humanize assessment and instruction including the place of responsive teaching Create a sense of belonging humanize technology integration and effect socially just teaching and learning all central issues in equity The truth is this there's no one framework there's no one tool that makes learning personalized what personalized learning companies with a vested interest in profits might tempt you to believe It's people who personalize learning and people not technology must be at the center of education The time is now for all of us teachers to reclaim personalized learning and this all important book is our very best resource for getting started This is a compelling and critically important book for our time With rich stories of teaching and learning Paul France considers ways to create the most positive learning experiences possible JO BOALER Nomellini Olivier Professor of Education Stanford
