Dodsworth,2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online offering researchers academics and students with information on how to locate and access the large variety of resources new and old Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources Additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets [GeoServer Cookbook](#) Stefano Iacovella,2014-11-27 This book is ideal for GIS experts developers and system administrators who have had a first glance at GeoServer and who are eager to explore all its features in order to configure professional map servers Basic knowledge of GIS and GeoServer is required [PostGIS Cookbook](#) Mayra Zurbarán,Thomas Kraft,Stephen Vincent Mather,Bborie Park,Pedro Wightman,2018-03-28 Create and manage spatial data with PostGIS Key Features Import and export geographic data from the PostGIS database using the available tools Maintain optimize and fine tune spatial data for long term viability Utilize the parallel support functionality that was introduced in PostgreSQL 9.6 Book Description PostGIS is a spatial database that integrates the advanced storage and analysis of vector and raster data and is remarkably flexible and powerful PostGIS provides support for geographic objects to the PostgreSQL object relational database and is currently the most popular open source spatial databases If you want to explore the complete range of PostGIS techniques and expose related extensions then this book is for you This book is a comprehensive guide to PostGIS tools and concepts which are required to manage manipulate and analyze spatial data in PostGIS It covers key spatial data manipulation tasks explaining not only how each task is performed but also why It provides practical guidance allowing you to safely take advantage of the

advanced technology in PostGIS in order to simplify your spatial database administration tasks Furthermore you will learn to take advantage of basic and advanced vector raster and routing approaches along with the concepts of data maintenance optimization and performance and will help you to integrate these into a large ecosystem of desktop and web tools By the end you will be armed with all the tools and instructions you need to both manage the spatial database system and make better decisions as your project s requirements evolve What you will learn Import and export geographic data from the PostGIS database using the available tools Structure spatial data using the functionality provided by a combination of PostgreSQL and PostGIS Work with a set of PostGIS functions to perform basic and advanced vector analyses Connect PostGIS with Python Learn to use programming frameworks around PostGIS Maintain optimize and fine tune spatial data for long term viability Explore the 3D capabilities of PostGIS including LiDAR point clouds and point clouds derived from Structure from Motion SfM techniques Distribute 3D models through the Web using the X3D standard Use PostGIS to develop powerful GIS web applications using Open Geospatial Consortium web standards Master PostGIS Raster Who this book is for This book is for developers who need some quick solutions for PostGIS Prior knowledge of PostgreSQL and spatial concepts would be an added advantage

ArcGIS for Desktop Cookbook Daniela Cristiana Docan,2015-01-22 This book is a good companion to get you quickly acquainted with everything you need to increase your productivity with the ArcGIS Desktop It would be helpful to have a bit of familiarity with basic GIS concepts If you have no previous experience with ArcGIS this book will still be helpful for you because it will help you catch up to the acquainted users from a practical point of view

Mapping, Monitoring, and Modeling Land and Water Resources Pravat Kumar Shit,Pulakesh Das,Gouri Sankar Bhunia,Dipanwita Dutta,2021-06-27 The wide range of challenges in studying Earth system dynamics due to uncertainties in climate change and complex interference from human activities is creating difficulties in managing land and water resources and ensuring their sustainable use Mapping Monitoring and Modeling Land and Water Resources brings together real world case studies accurately surveyed and assessed through spatial modeling The book focuses on the effectiveness of combining remote sensing geographic information systems and R The use of open source software for different spatial modeling cases in various fields along with the use of remote sensing and geographic information systems will aid researchers students and practitioners to understand better the phenomena and the predictions by future analyses for problem solving and decision making

Geocomputation Chris Brunsdon,Alex Singleton,2015-01-22 Geocomputation is the use of software and computing power to solve complex spatial problems It is gaining increasing importance in the era of the big data revolution of smart cities of crowdsourced data and of associated applications for viewing and managing data geographically like Google Maps This student focused book Provides a selection of practical examples of geocomputational techniques and hot topics written by world leading practitioners Integrates supporting materials in each chapter such as code and data enabling readers to work through the examples themselves Chapters provide highly applied and practical discussions of Visualisation

and exploratory spatial data analysis Space time modelling Spatial algorithms Spatial regression and statistics Enabling interactions through the use of neogeography All chapters are uniform in design and each includes an introduction case studies conclusions drawing together the generalities of the introduction and specific findings from the case study application and guidance for further reading This accessible text has been specifically designed for those readers who are new to Geocomputation as an area of research showing how complex real world problems can be solved through the integration of technology data and geocomputational methods This is the applied primer for Geocomputation in the social sciences *Internet 101* Wendy G. Mastering GeoServer Colin Henderson,2014-11-25 If you are a GIS professional who intends to explore advanced techniques and get more out of GeoServer deployment rather than simply delivering good looking maps then this book is for you **Expert GeoServer** Ben Mearns,2018-07-31 A fast paced guide to putting your GeoServer based application into fast user friendly and secure production Key Features Resolve bottlenecks optimize data stores and cluster server resources Use identity management and authentication for a user specific secure web application Go beyond traditional web hosting to explore the full range of hosting options in the cloud Book Description GeoServer is open source server side software written in Java that allows users to share and edit geospatial data In this book you ll start by learning how to develop a spatial analysis platform with web processing services Then you ll see how to develop an algorithm by chaining together geospatial analysis processes which you can share with anyone in the world Next you ll delve into a very important technique to improve the speed of your map application tile caching Here you ll understand how tile caching works how to develop an effective tile cache supported web service and how to leverage tile caching in your OpenLayers web application Further on you ll explore important tweaks to produce a performant GeoServer backed web mapping application Moving on you ll enable authentication on the frontend and backend to protect sensitive map data and deliver sensitive data to your end user Finally you ll see how to put your web application into production in a secure and user friendly way You ll go beyond traditional web hosting to explore the full range of hosting options in the cloud and maintain a reliable server instance What you will learn Develop a WPS processing service to allow web based geospatial data processing Get to know important techniques to improve the speed of your web map application tile caching raster data optimization and server clustering Find out which GeoServer settings resolve bottlenecks Develop an algorithm by chaining geospatial analysis processes together Put your application into production with hosting monitoring and automated backup and recovery Understand how to develop an effective tile cache supported web service Master techniques that ensure resilient server deployment Who this book is for

This book is for anyone who wants to learn about advanced interfaces security and troubleshooting techniques in GeoServer. A basic understanding of GeoServer is required. *OpenLayers 2.10 Beginner's Guide* Erik Hazzard, 2011-03-18. Create, optimize, and deploy stunning cross-browser web maps with the OpenLayers JavaScript web mapping library. *Bringing GEOSS services into Practice for Beginners: GeoNode Tutorial* Yaniss Guigoz, Pierre Lacroix, Abel Gelman, Gregory Giuliani, 2017-04-10. This tutorial complements the Bringing GEOSS services into practice workshop available at <http://www.geosintopractice.org>. **Practical GIS** Gábor Farkas, 2017. Learn the basics of Geographic Information Systems by solving real-world problems with powerful open-source tools. About This Book: This easy-to-follow guide allows you to manage and analyze geographic data with ease using open-source tools. Publish your geographical data online. Learn the basics of geoinformatics in a practical way by solving problems. Who This Book Is For: The book is for IT professionals who have little or no knowledge of GIS. It's also useful for those who are new to the GIS field who don't want to spend a lot of money buying licenses of commercial tools and training. What You Will Learn: Collect GIS data for your needs. Store the data in a PostGIS database. Exploit the data using the power of the GIS queries. Analyze the data with basic and more advanced GIS tools. Publish your data and share it with others. Build a web map with your published data. In Detail: The most commonly used GIS tools automate tasks that were historically done manually: compiling new maps by overlaying one on top of the other or physically cutting maps into pieces representing specific study areas; changing their projection and getting meaningful results from the various layers by applying mathematical functions and operations. This book is an easy-to-follow guide to use the most matured open-source GIS tools for these tasks. We'll start by setting up the environment for the tools we use in the book. Then you will learn how to work with QGIS in order to generate useful spatial data. You will get to know the basics of queries, data management, and geoprocessing. After that, you will start to practice your knowledge on real-world examples. We will solve various types of geospatial analyses with various methods. We will start with basic GIS problems by imitating the work of an enthusiastic real estate agent and continue with more advanced but typical tasks by solving a decision problem. Finally, you will find out how to publish your data and results on the web. We will publish our data with QGIS Server and GeoServer and create a basic web map with the API of the lightweight Leaflet web mapping library. Style and approach: The book guides you step by step through each of the core concepts of the GIS toolkit, building an overall picture of its capabilities. This guide approaches the topic systematically, allowing you to build upon what you learned in previous chapters. By the end of this book, you'll have an understanding of the aspects of building a GIS system. *GeoServer Implementation Guide* Richard Johnson, 2025-06-28. The GeoServer Implementation Guide is an authoritative and comprehensive resource for professionals seeking to unlock the full potential of GeoServer in enterprise geospatial environments. Designed to address every critical facet of GeoServer's architecture, the book journeys from foundational concepts such as modular design, interoperability, and adherence to key OGC standards to nuanced explorations of system performance, deployment strategies,

and integration within wider geospatial ecosystems Through rigorous analysis readers gain clarity on the platform s request lifecycle data management flows and architectural decisions impacting scalability and reliability Meticulously structured the guide walks readers through advanced installation configuration and environment preparation offering actionable insights for both automated provisioning and manual tuning In depth chapters provide real world guidance on securing deployments performing resilient upgrades optimizing connections to diverse data stores including traditional databases NoSQL backends and distributed cloud storage and implementing change management strategies for complex and evolving datasets Richly detailed coverage of service publishing covers the intricate requirements of OGC APIs multidimensional data transactional editing and advanced logging thereby empowering practitioners to build robust secure and scalable geospatial services Distinguished by its commitment to hands on solutions the book delves into state of the art styling and visualization techniques fine grained security architectures and extensibility frameworks for custom development It presents a wealth of strategies for scaling in cloud native environments implementing high availability and disaster recovery and achieving seamless operability through modern monitoring stacks and maintenance pipelines Whether you are architecting enterprise geospatial solutions developing custom GeoServer plugins or ensuring operational excellence and compliance the GeoServer Implementation Guide stands as the essential reference to elevate and future proof your geospatial infrastructure

Explore Enhanced Interfaces with Geoserver Ben Mearns,2017 A fast paced guide to building more complex web applications using GeoServer Web Services OpenLayers API and PostGIS You will start the course by learning how to harness the capabilities of Web Map Service WMS beyond simple interactivity Here you will understand GeoServer Layers and how to add information to your map by using cartographic styles styling data with cascading style sheets working with labels and scale dependency Further you will explore the features of the OpenLayers API beyond simple interactivity and printing maps through the interface You will learn about Common Query Language CQL and create an application that provides filtering and dynamic symbolization through the use of CQL to bring a more user specific experience to your web application You ll take this to the next level with deployment of a spatial database PostGIS in tandem with GeoServer PostGIS adds support for geographic objects by allowing location queries to be run in SQL Here you will cover the installation and population of the database in order to get it ready for GeoServer You will use Web Feature Service WFS to provide feature level read and write access involving the spatial database Finally you will learn about the creation of a mobile responsive user interface with OpenLayers utilizing geolocation to provide a user experience specific to their current location on top of GeoServer with write capability Resource description page

Fundamentals of GeoServer Ben Mearns,2017 GeoServer is an open source server side software written in Java and allows users to share and edit geospatial data Designed for interoperability it publishes data from any major spatial data source using open standards GeoServer can create maps in a variety of output formats OpenLayers a free mapping library is integrated into GeoServer making map generation quick and easy GeoServer is

built on GeoTools an open source Java GIS toolkit In this Volume you will cover the foundations of GeoServer so that you understand how GeoServer works We will start by exploring the software platform on which GeoServer runs including the operating system Java runtime and the other libraries on which GeoServer depends you will learn about the minimum recommended specifications and JRE dependencies Next you will learn to troubleshoot problems that may occur in a GeoServer installation before they happen you will also learn how to choose the type of installation for GeoServer in order to optimize your experience Further you will be guided through installing GeoServer on your chosen platform learning not just how to install GeoServer but what exactly you ve installed After installation you will learn about the default web mapping API for GeoServer OpenLayers how to test it and how to make your first OpenLayers web map on your local file system Finally you will learn about GeoServer data stores adding data in GeoServer and how to create data stores from local and external resources in a variety of formats using GeoServer management features Resource description page
