Effective reading and learning strategies are increasingly important because of the vast amount of information you'll encounter. Beyond academic information, you must process and interpret news, instructions, communications, and a wealth of other data. You read to get new information, and you read to familiarize yourself with material you've learned before. Neither can be hurried.

**Estimate your required reading time** by considering the type of material assigned and whether it includes other activities such as practice or explorations. For typical textbooks, most
