**Pennsylvania Government and Politics** Thomas J. Baldino, Paula A. Duda Holoviak, 2024-03-12 This book provides a comprehensive examination of the Keystone State's formal and informal political institutions and players past and present and elucidates the place each holds in governing the commonwealth today. Covering a period of more than three hundred years, this volume presents a clear and succinct overview of the commonwealth's political history, culture, and geography, interactions between office holders, civil servants, special interest groups, and the media, policy development and implementation, how laws are created, enacted, and enforced, hierarchy and interaction among state, county, local, and special district government bodies and officials, tax collection and disbursement, and the political upheaval in the wake of the COVID-19 pandemic and the 2020 presidential election. Featuring practical appendixes and interviews with current and past office holders, bureaucrats, party leaders, and political journalists, this astute and informative book is an indispensable tool for understanding politics in the Keystone State.

**Food for Degrowth** Anitra Nelson, Ferne Edwards, 2020-11-22 This collection breaks new ground by investigating applications of degrowth in a range of geographic, practical, and theoretical contexts along the food chain. Degrowth challenges growth and advocates for everyday practices that limit socio-metabolic energy and material flows within planetary constraints. As such, the editors intend to map possibilities for food for degrowth to become established as a field of study. International contributors offer a range of examples and possibilities to develop more sustainable, localised, resilient, and healthy food systems using degrowth principles of sufficiency, frugal abundance, security, autonomy, and conviviality. Chapters are clustered in parts that critically examine food for degrowth in spheres of the household, collectives, networks, and narratives of broader activism and discourses. Themes include broadening and deepening concepts of care in food provisioning and social contexts, critically applying appropriate technologies, appreciating and integrating indigenous perspectives, challenging notions of waste, circular economies, and commodification, and addressing the ever-present impacts of market logic framed by growth. This book will be of greatest interest to students and scholars of critical food studies, sustainability studies, urban political ecology, geography, environmental studies, such as environmental sociology, anthropology, ethnography, ecological economics, and urban design and planning.
