*Handbook of Research on Nurturing Industrial Economy for Africa's Development* Nafukho, Frederick Muyia, Boniface Makulilo, Alexander, 2021-03-19 A robust manufacturing sector is a necessity and a sufficient condition for any country's human and economic development as it creates employment and alleviates poverty. During this Fourth Industrial Revolution era, there is an urgent need in Africa to optimally utilize the existing resources to support manufacturing or else risk allowing the continent to fall behind in the industrial economy. Innovative strategies are needed that can unlock Africa's manufacturing potential by exploring key areas that may help Africa mature and launch modernized economies that will benefit the developed world's industrial economy. The Handbook of Research on Nurturing Industrial Economy for Africa's Development examines various innovations necessary for Africa's economic development, including drivers of the manufacturing economy such as education, agriculture, human capital, science, and technological innovations, language, politics, and business environments. The book explores strategies to increase Africa's economic diversity, complexity, productivity, and ultimately competitiveness, and for the continent to realize its manufacturing industrial potential. Further chapters focus on African countries' industrial economies in the African context and facilitating the fulfillment of the Sustainable Development Goals (SDGs) and the African Union's Agenda 2063. This book is a valuable reference tool for government officials, economists, industrialists, practitioners, stakeholders, researchers, academicians, and students interested in the industrial economic development of Africa.

*African Women and Intellectual Leadership* Maurice Nyamanga Amutabi, Emily Achieng' Akuno, Humphrey J. Ojwang, Dannica Fleuss, 2024-02-29 This book highlights the pioneering roles of African women as leaders and role models in Kenya, providing examples taken from across education, health, business, and a range of other sectors. Drawing on authentic first-hand accounts and narratives from key women in leadership positions and those who have lived with them, the book presents the life stories of women leaders over the last fifty years, aiming to preserve their contributions for posterity and to inspire young people with moral, ethical, and progressive role models. The book uses African knowledge production strategies that look at the human being holistically in the prism of Ubuntu in order to define leadership in Africa from an African perspective, one that celebrates the role of the mother figure and places women at the centre of African values and societal dynamics. This book will be of interest to researchers and students of African studies, gender studies, and Kenyan education and socio-political history.
