Australian Taxation Study Manual, Tax Reform with the 20/20 Tax James C. Tanner, 2015-12-02 Many books have been written about tax reform, but none offer the pragmatic and understandable approach that you'll find in this treatise. Filled with a nonpartisan set of solutions to fix an antiquated and indecipherable tax system, James C. Tanner, a certified public accountant with more than four decades of experience, explores how we can create a fair and logical tax framework by rethinking income exclusions, exemptions, deductions, credits, tax brackets, capital gains, and other tax alternatives. Reform tax expenditures including health insurance and medical costs, home mortgage, and other interest deductions, retirement plan deductions, charitable donations, and capital gains on assets sold and transferred. Lower the tax rates for most individual and corporate taxpayers while making our US companies more competitive with their foreign counterparts. Tanner also outlines how historical decisions and legislative proposals led to our current tax laws under the premise that we can't fix them without understanding why they were created in the first place. For those who want to participate in the national debate on federal tax reform, it begins with a firm understanding of the system and the practical proposals in Tax Reform with the 20/20 Tax.

International Taxation of Manufacturing and Distribution John Abrahamson, 2016-02-18 The most thorough treatment of its subject available, this book introduces and analyses the international tax issues relating to international manufacturing and distribution activities, extending from the tax regime in the country where the manufacturing activities are located through to regional purchase and sales companies to the taxation of local country sales companies. The analysis includes the domestic tax laws relating to manufacturing and distribution, company profits, as well as international tax issues relating to income flows and the payment of dividends. Among the topics and issues analysed in depth are the following: foreign tax credits, taxation in the digital economy, tax incentives, intellectual property, group treasury companies, mergers and acquisitions, leasing, derivatives, controlled foreign corporation provisions, VAT and customs, tariffs, free trade agreements, and customs unions, transfer pricing, role of tax treaties, hedging, related accounting issues, deferred tax assets and liabilities, tax risk management, supply chain management, depreciation allowances, and carry forward tax losses. The book includes descriptions of 21 country tax systems and ten detailed case studies applying the analysis to specific examples. Detailed up-to-date attention is paid to the OECD Action Plan on Base Erosion and Profit Shifting (BEPS) and other measures against tax avoidance. As a full-scale commentary and analysis of international taxation issues for multinational manufacturing groups, including in-depth consideration of corporate structures, tax treaties, transfer pricing, and current developments, this book is without peer. It will prove of inestimable value to all

accountants lawyers economists financial managers and government officials working in international trade environments
