

Geometry of Circles

Students who successfully complete this primer will be able to:

- Calculate the area and circumference of a circle.
- Apply the relationship between the radius of a circle and an arc length.

Radius, radians, and arc length

In many physics applications, it is necessary to connect between the distance from the center of a circle, the radius r , and the distance along the circumference, called the arc length s . These two parameters are related by the angle θ swept out from the starting point of the arc, typically defined as the x -axis, and the end point $(\cos\theta, \sin\theta)$.

Scientists and mathematicians typically measure the angle θ in radians rather than degrees, which is defined as:

$$1 \text{ (radian)} = \left\{ \frac{1}{r} \right\} s = r\theta$$

The second formula is another way to write the definition of circumference with s being an arc that contains an entire circle and r being the radius of the circle. That means that 2π must be the angle of the entire circle:

$$2\pi \text{ (radians)} = 2\pi \text{ (radius)} = 2\pi r$$

In fact, the radius of a circle can be thought of as a conversion factor between the angular position θ and the arc length s :

$$1 \text{ (radius)} = 1 \text{ (radius)} \left(\frac{2\pi \text{ (radius)}}{2\pi \text{ (radians)}} \right) = 2\pi r$$

Part C - Determining arc length

What is the length of an arc on a circle of radius 20.0 cm when $\theta = 60^\circ$?

Express your answer (in cm) to three significant figures.

Mastering Physics Answers Chapter 3:

Objectivity and the Language-Dependence of Thought Christian Barth, 2014-06-03 Does thought depend on language Primarily as a consequence of the cognitive turn in empirical disciplines like psychology and ethology many current empirical researchers and empirically minded philosophers tend to answer this question in the negative This book rejects this mainstream view and develops a philosophical argument in favor of a universal dependence of language on thought In doing so it comprises insights of two primary representatives of 20th century and contemporary philosophy namely Donald Davidson and Robert Brandom Barth offers an introduction to the debate concerning the language dependence of thought and lays the methodological foundation for the subsequent argument in favor of a universal dependence of thought on language presenting an account and defense of the transcendental method in reference to the writings of Peter F Strawson He then offers a transcendental argument in favor of a universal language dependence of thought beginning with a reevaluation of a basic idea for an argument originally presented by Donald Davidson Later two main objections to the conclusion of this transcendental argument are addressed and rejected using Robert Brandom s inferentialist and normativist account of thought and language In the course of doing so the recent debate on Brandom s work is addressed extensively and main objections to Brandom s work are presented and answered *College Physics* Randall Dewey Knight, Brian

Designing for Situated Knowledge Transformation Nina Bonderup Dohn, Stig Børsen Hansen, Jens Jørgen Hansen, 2019-11-27 How can knowledge developed in one context be put to use in other contexts How can students learn to do so How can educators design for learning this These are fundamental challenges to many forms of education The challenges are amplified in contemporary society where people traverse many different contexts and where contexts themselves are continuously changing *Designing for Situated Knowledge Transformation* provides a structured answer to

these questions through an investigation of the theoretical empirical methodological and pedagogical design aspects which they involve Raising profound questions about the nature of knowledge of situativity and of transfer transformation and resituation it calls for and provides extended empirical studies of the forms of transformation that knowledge undergoes when people find themselves in new contexts while relying on existing knowledge Considering many avenues of practical application and insight Designing for Situated Knowledge Transformation develops a coherent framework for developing learning designs for knowledge transformation that is crucial in today s educational settings
