Column "A"

Column "B"

Column "C"

- | | | |
|---|--|--|
| <p>___ 1. Market</p> | <p>___ A. A good for which demand rises/falls) as income rises/falls).</p> | <p>a. A place where buyers and sellers meet (over the counter-OTC) or virtually (e-commerce).</p> |
| <p>___ 2. Demand</p> | <p>___ B. The willingness & ability of sellers to produce & offer to sell different Quantities (Qty's) of a good at different prices during a specific time period</p> | <p>b. The price of the product in question that is usually shown on a price tag or a sticker price.</p> |
| <p>___ 3. Law of Demand</p> | <p>___ C. Any place people come together to trade or exchange (may take place at a physical or virtual location.)</p> | <p>c. The direct (positive) relationship that exist between the price of a product and its quantity offered for sale. These two variables move in the same direction (as the $P_x \uparrow \rightarrow Qty \uparrow$) or as $P_x \downarrow \rightarrow Qty \downarrow$), CP.</p> |
| <p>___ 4. Demand Schedule</p> | <p>___ D. The willingness & ability of buyers to purchase different Qty of a good at different prices during a specific time period</p> | <p>d. A good whose quantity demanded increases/decreases) with an increase(a decrease) in income. The Qty demanded of these kinds of goods and services (G&Ss) is directly related to the level of income the consumer earns. What is "normal" in one society may be considered "inferior" in other societies and the vice versa because of culture & living standard. Examples include: Luxury goods, Fancy restaurant meals as opposed to fast foods ("inferior goods").</p> |
| <p>___ 5. Demand Curve</p> | <p>___ E. As the price of a good rises, the quantity (Qty) demanded of the good falls, & as the price of a good falls, the quantity demanded of the good rises, Ceteris Paribus (CP).</p> | <p>e. Products that are consumed or used together. The quantity demanded of these kinds of goods depend on the price of the other, in the pair. Examples: Car & gasoline, Camera & rolls of films, Tooth brush & tooth paste. The quantity demanded of SUV's depend on the price of Gasoline. The higher the price of gas, the lesser the number of SUV's demanded, ceteris paribus (CP).</p> |
| <p>___ 6. Law of Diminishing Marginal Utility</p> | <p>___ F. The numerical tabulation of the quantity demanded of a good at different prices. It is the numerical representation of the law of demand (DD).</p> | <p>f. The law that describes the declining nature of the additional or extra satisfaction that consumers get by consuming successive units of the same product within relative short period of time. It applies to all goods and services except for money (which is a "special commodity"). The marginal utility of money is somewhat constant unlike other commodities that are subject to the diminishing satisfaction. Each additional dollar received has equal additional satisfaction as the previous dollar to humans. This is part of the reason some people can't get enough of it, even after, they become millionaires and billionaires. Examples of this law (LDMU) at work: The level of additional satisfaction received from drinking successive cans of soda within a short period of time or a repeated visit or trip to Disney land amusement park day after day.</p> |
| <p>___ 7. Own Price</p> | <p>___ G. A good for which demand falls/rises) as income rises/falls).</p> | <p>g. A good whose quantity demanded decreases/increases) with an increase(a decrease) in income. The quantity demand of these kinds of goods and services (G&Ss) is inversely related to the level of income the consumer may earn. Examples include: used clothes & furniture, and bus travel.</p> |
| <p>___ 8. Normal Good</p> | <p>___ H. Two goods that satisfy similar needs or desires. The demand for one rises/falls) as the price of the other rises/falls)</p> | <p>h. The desire to consume or use a product, it is effective only when the willingness to pay for a product is matched by the purchasing power or ability to pay.</p> |
| <p>___ 9. Inferior Good</p> | <p>___ I. A good for which demand does not change as income rises/falls).</p> | <p>i. The inverse (negative) relationship that exist between the price of a product and its quantity demanded. These two variables move in opposite direction (as the $P_x \uparrow \rightarrow Qty \downarrow$) or as $P_x \downarrow \rightarrow Qty \uparrow$), ceteris paribus (CP). This is because higher (lower) price discourage (encourage) consumption spending, CP.</p> |
| <p>___ 10. Neutral Good</p> | <p>___ J. The graphical representation of the law of demand. It represents the price-quantity combination of a particular single buyer. It connects the maximum buying prices that the consumer is willing to pay for different quantities of a given product.</p> | <p>j. A tabular representation of the law of demand showing the quantities that the consumer is willing and able to buy at different sets of prices.</p> |
| <p>___ 11. Substitutes</p> | <p>___ K. As the price of a good rises, the quantity supplied (SSed) of the good rises, & as the price of a good falls, the quantity supplied of the good falls, ceteris paribus (CP).</p> | <p>k. A good or service whose quantity demanded doesn't depend at all on the level of income earned by the consumer. The consumer demands the same amount of the good or service regardless of the level of income (richer or poorer). A perfect example could be air but air is not an economic good it is a free good that cannot be purchased from the market. Less than perfect examples include: the quality and quantity of water or toilet tissue or salt consumed or used.</p> |
| <p>___ 12. Complements</p> | <p>___ L. Two goods that are used jointly in consumption. The DD for one rises (falls) as the price of the other falls (rises).</p> | <p>l. The pictorial or graphical representation of the demand schedule or table that makes it easy to visualize the inverse (negative) relationship that exist between price and quantity demand (the law of demand).</p> |
| <p>___ 13. Supply</p> | <p>___ M. For a given time period, the marginal (or additional) utility or satisfaction gained by consuming equal successive units of a good will decline as the amount consumed increases.</p> | <p>m. Products that can serve as good replacements to each other for which the consumer is somewhat indifferent to choose from. Examples of pairs include: Coffee & tea, and Coke & Pepsi.</p> |
| <p>___ 14. Law of Supply</p> | <p>___ N. The price of a good in question(price of the good itself).</p> | <p>n. The desire and the ability to produce a good or a service by a producer & make it available for sale.</p> |
