

# Position Paper

## Background

The European Commission has published their proposal for a regulation that covers many aspects of AI (Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL LAYING DOWN HARMONISED RULES ON ARTIFICIAL INTELLIGENCE (ARTIFICIAL INTELLIGENCE ACT) AND AMENDING CERTAIN UNION LEGISLATIVE ACTS COM/2021/206 final) in April 2021. The draft Artificial Intelligence Act (AIA) is a horizontal regulation implementing a risk-based approach to identify the level of control on AI Systems being placed on the European market. The members of the Team NB, the EU association for Notified Bodies for medical devices and IVDs publish this position-paper with the intention to express their opinion and concerns regarding the upcoming regulations, with a focus on the interface and overlap between the upcoming regulations and the Medical Device Regulation (MDR) and IVD Regulation (IVDR).

## Definitions

Article 3(1): ‘artificial intelligence system’ (AI system) means software that is developed with one or more of the techniques and approaches listed in Annex I and can, for a given set of human-defined objectives, generate outputs such as content, predictions, recommendations, or decisions influencing the environments they interact with

Annex I:

- (a) Machine learning approaches, including supervised, unsupervised and reinforcement learning, using a wide variety of methods including deep learning;
- (b) Logic- and knowledge-based approaches, including knowledge representation, inductive (logic) programming, knowledge bases, inference and deductive engines, (symbolic) reasoning and expert systems;
- (c) Statistical approaches, Bayesian estimation, search and optimization methods.

## **Team NB Opinion:**

The definition used includes terms related to logic and knowledge-based systems. This is an overly broad definition such that it could potentially include non-AI systems leading to confusion for the regulators, manufacturers and notified bodies. Since the goal of standardization is to provide harmonized definitions of technologies for the purpose of exchanges between relevant stakeholders, we recommend to use the definition found in the international standard “*ISO/IEC 2382:2015, Information technology – Vocabulary*”.

Belt And Road Initiative, The: Implications For The International Order Moritz Rudolf,2021-09-14 This book showcases how the People s Republic of China PRC has been utilizing the Belt and Road Initiative BRI to reshape the global order Dissecting China s increasingly assertive international behaviour the book demonstrates how the PRC projects its self perception onto the international order The book outlines five aspects of China s international role projection which the PRC applies selectively depending on its target audience

- 1 The bearer of traditional Chinese culture
- 2 The humiliated nation
- 3 The socialist state with Chinese characteristics
- 4 The developing state and promoter of international development
- 5 The authoritarian globalization optimist

Drawing on an in depth analysis of hundreds of primary BRI documents the book offers a comprehensive overview of China s most crucial foreign policy agenda item It demonstrates how through the BRI the PRC has introduced mechanisms to the international level which reflect its domestic policy making mode In addition the PRC has institutionalized the initiative by establishing China centered BRI networks across a wide range of policy areas Within those emerging China centered BRI networks the PRC systematically increases its international discursive power for example by inserting Chinese vocabulary into UN resolutions or by promoting Beijing s approaches vis vis the rule of law across a range of developing states This book also further discusses the implications of the BRI for the international legal order

Environmental Integration in the EU's External Relations Gracia Marín Durán,Elisa Morgera,2012-03-16 The book examines the little explored unilateral bilateral and inter regional dimensions of EU external environmental policy in light of the Treaty based requirement of environmental integration both at the formulation and at the implementation stages
