Therefore, the current study helps us understand how short-term food deprivation affects concentration on and perseverance with a difficult task. Method

Participants

The octagons were to be placed on top of each other in a specific way to make the silhouette of a rabbit. However, three of the shapes were slightly altered so that the task was impossible. Perseverance scores were calculated as the number of minutes that a participant spent on the puzzle task before giving up.

Passive voice is used to emphasize the experiment, not the researchers; otherwise, active voice is used.

Procedure

At an initial meeting, participants gave informed consent. Each consent form contained an assigned identification number and requested the participant's GPA. Students were then informed that they would be notified by e-mail and telephone about their assignment to one of the
